INDEX OF CITIES AND TOWNS

This alphabetical list of cities and towns gives statistics of population based on the latest official census reports. Each line begins with the name of a place, followed by the name of the country or state, the population, the index references and the plate number. The index references indicate the location of the city or town on the accompanying map plates, as explained on page 1. Where a place may be known under different names or by various spellings of the same name, the different forms have been inserted to a large extent in the index, while on the majority of the foreign maps will be found most of the more important place names given in accordance with local official forms of spelling, the conventional form following in parentheses. Where the same place name occurs two or more times within one country, each is followed by the name of a minor political division in italics.

Where space on the map has not permitted giving the complete form of a name, the extended form is shown in the index. Some comparatively unimportant places have been omitted from the maps to avoid crowding and consequent indistinctness in the engraving; such omitted towns will be found in the list and their situation on the map, in each case, may readily be determined by means of the index references.

Capitals of countries and states are designated by asterisks (*'s).

INDEX

CITIES AND TOWNS OF THE UNITED STATES

In this compilation are given the official population figures for all incorporated cities, villages and boroughs according to the latest Federal (1930) Census. For unincorporated places which are not separately enumerated by the Census, recent estimates supplied by local officials or other reliable authorities are given.

Capitals of states are printed in capital letters, and places having one hundred or more inhabitants are named. The index references enclosed in parenthesis, indicate location of city or village on the accompanying maps.

Some comparatively unimportant places have been omitted from the maps to avoid crowding and consequent indistinctness in the engraving; such omitted towns will be found in the list and their situations on the map, in each case, may readily be determined by means of the index-reference letters and numbers.

LATEST CENSUS

Capitals of provinces are printed in capital letters. The index references, enclosed in parentheses, indicate location of city or village on the accompanying maps.

Some comparatively unimportant places have been omitted from the maps to avoid crowding and consequent indistinctness in the engraving; such omitted towns will be found in the list and their situations on the map, in each case, may readily be determined by means of the index-reference letters and numbers.

Descriptive Gazetteer of the Principal Countries of the World

ABYSSINIA SEE ETHIOPIA AFGHANISTAN

The Country. The length of Afghanistan from the Persian frontier to the Khyber Pass is about 600 miles and the extreme width north to south about 500 miles, estimated area being 245,000 square miles. It is mainly mountainous, broken by deep ravines and fertile valleys.

Government. Afghanistan is a constitutional monarchy. The country is divided into provinces, each ruled by a governor responsible to the King.

Commerce and Industry. Climate and products are those of temperate regions, varying in altitude, permitting cultivation in the south of tobacco, cotton and fruits. The spring crop consists of **wheat**, **barley** and lentils and the autumn harvest produces rice, millet, sorghum, tobacco and corn. Cotton goods, indigo, tea and sugar are the chief articles of import and the **wool** and skins of fat-tailed sheep, cattle, horses, timber, **fruit**, **silk** and drugs are the principal exports. Of manufactured articles, silk, felts and carpets are the most important. Metric system of weights and measures.

Communications. There are no railways in the country. The Khyber and Bolan roads are fit for light-wheeled traffic as far as Kabul and Kandahar, respectively. Merchandise is still transported on camel or pony back. Telephonic communication exists between Peshawar-Kabul, and Kabul-Kandahar, and it is being extended between Termez-Kabul, Kandahar-Chaman and Kandahar-Herat.

Principal Towns. The principal towns are Kabul, the capital, 6,396 feet above sea level; Herat, the chief town in the west, an important depot for the carpets of central Asia; Kandahar, the chief city in the south; and Mazari-Sharif.

ALBANIA

The Country. Albania is a mountainous country on the western side of the Balkan peninsula, with an area of about 17,374 square miles. Following a period of anarchy during the European war of 1914, a provisional government was set up at Durazzo in 1917. A republic, which was subsequently proclaimed, continued till 1928 and on September of that year the Republic was changed into a Monarchy. Albania is now, therefore, a democratic, parliamentary, independent monarchy, without any state religion and with only one elected chamber. In the center, part of the plateau is cultivable and, in the south, there is fertile alluvial soil with grazing land on the slopes. Saseno Island, off the Albanian coast, forms the Gibraltar of the Adriatic.

Commerce and Industry. Albania has little outside trade. **Tobacco**, **wool** and **olive oil** are the principal products. Forests are scarce, but as for minerals, Albania possesses silver, copper, gold and lead. There is little agriculture, but in a few districts, fair crops of corn are raised and olives, mulberries and other fruits are grown. Flocks and herds provide the main subsistence of the people.

Communications. Northern Albania has one road connecting Durazzo and Tirana with Scutari. Central Albania has no roads but some military roads have been constructed in the south.

Principal Towns. The principal towns are Durazzo, a port; Tirana, the capital; Scutari, Elbassan, the port Vlorë (Valona), and Gorizia (Korytsa).

ANDORRA

The Country. A small semi-independent republican state in the eastern Pyrenees, with an area of about 191 square miles.

Government. Andorra is under the joint suzerainty of the president of France and the bishop of Urgel and its government is intrusted to a council of twenty-four members, holding office for four years, who elect the first and second syndic to preside. The executive power rests with the first syndic, while the civil judge and two magistrates alternately exercise judicial power. Catalan is spoken.

Commerce and Industry. Agriculture thrives where soil is suited to tillage; rye, barley, vines and **tobacco** being cultivated. There is also some mineral wealth, especially iron and lead. Transport difficulties make exploitation doubtful. The inhabitants pay much attention to stock-breeding. **Principal Town:** Andorra la Vella.

ARGENTINA

The Country. A South American republic with an area of about 1,153,119 square miles. The republic measures about twenty-three hundred miles from north to south. It is mountainous toward the west and the mountains extend to the Western Andes. The remainder of the surface consists of grassy plains, forested hills, drained by the Parana, Plata, Colorado and other rivers flowing into the Atlantic.

Government. The constitution of the Argentine Confederation resembles that of the United States. The republic consists of 14 provinces, 10 territories and one federal district. The provinces elect their own governors and legislatures. The territories are under governors appointed by the president. The executive power, which is practically independent of the legislature, is in the hands of a president elected for six years by electors appointed by the provinces. The national congress consists of a senate and a house of deputies. There are 30 senators, two elected by each province and two by the capital; one-third of the senate is renewed every three years. The 158 deputies are elected directly by the people for four years, but half the house retires every two years. Justice is administered by a federal court of five judges which sits at Buenos Aires, five appeal courts, one with five judges at Buenos Aires, and four with three each at La Plata, Cordoba, Parana, and Rosario; and provincial and a number of minor courts. Each province has formulated its own judicial system.

Commerce and Industry. Argentina is in the forefront among the countries in exporting food and raw materials, such as **wheat**, **corn**, **linseed**, oats, **alfalfa**, wool, chilled or **frozen meats** and **hides**. The largest refrigerating plant in the world is at Buenos Aires, while near Bahia Blanca is the largest grain elevator in the Southern Hemisphere. Tobacco-growing is not inconsiderable and cotton-growing is increasing. The northern forests supply hard quebracho, excellent for building but also exported for use in tanning. Textiles, food-stuffs, iron, glassware and oil are the chief articles of import. The metric system of weights and measures is compulsory.

Communications. There are about 25,000 miles of railways in operation, of which about 4,500 miles are owned by the government. The rivers Parana, Plata, and Uruguay also form important means of communication. There is an excellent postal, telegraph and telephone system, and cable communication with all parts of the world.

Principal Cities. Buenos Aires, the capital; Rosario, Avellaneda, Cordoba, Tucuman, Santa Fe, Mendoza, La Plata, Bahia Blanca, Parana and Salta.

AUSTRALIA

The Country. Australia may be considered the largest island and the smallest continent in the world. It is the greatest isolated mass of land south of the equator. Its total area, including the island of Tasmania, but excluding islands and other territory under mandate from the League of Nations, is 2,974,581 square miles, with a coastline of about 8,800 miles. Its extreme measurements are from Cape York in the north to Wilson's Promontory in the south, about 2,000 miles, and from Steep Point in the west to Cape Byron in the east, 2,450 miles. Its climate is partly temperate and partly sub-tropical. Tasmania, the island of the southeast, is the most temperate area, with a climate similar to that of Ireland. A series of highlands runs along the eastern and northeastern shores of Australia; coastal plains are the feature of the southeastern littoral. These broaden out in the eastern half of the interior into a great plain through which flow the main rivers of New South Wales, Victoria and South Australia—the Darling, Murrumbidgee and Murray. This plain covers nearly the whole of New South Wales and adjacent parts of Queensland and Victoria. Another large plain stretches inland along the Great Bight in the south, but both middle and southern plains give way to the western plateau, which reaches from the Indian Ocean to Eyre's Peninsula and comprises over half the continent. Although the Darling, Murrumbidgee and Murray water the great area of the eastern plains, and are both navigable and irrigable for hundreds of miles, the western half of the continent is almost waterless. The soil is generally fertile—even in the most arid districts a heavy rainfall favors a rapid growth of vegetation—but while the eastern shores are washed by a warm ocean current from the north, the western shores are washed by a cold current from the Antarctic Ocean. The eastern half is visited at intervals of every few years by droughts causing heavy loss and suffering. In the northern tropical belt, where several short but torrential rivers run into the sea, growth is again luxuriant; but the whole of this great district, potentially wealthy in minerals as well as in pasture and arable land, awaits development. The eastern plains form one of the great stock-raising districts of the world.

Government. The Commonwealth of Australia is divided politically into six states: New South Wales, Western Australia, South Australia, Victoria, Queensland, Tasmania and three territories, North Australia, Central Australia and the Federal Capital Territory. In 1906 the administration of part of Papua (British New Guinea) was transferred to the Commonwealth. Australia is a self-governing dominion of the British Empire and its constitution is defined by the Commonwealth of Australia Constitution Act as "an indissoluble Federal Commonwealth under the Crown of the United Kingdom." It is governed, like other British Dominions, by a governor-general appointed by and responsible to the crown; the governor-general is assisted by an advisory federal executive council—in practice, the commonwealth cabinet of the day. The Australian parliament consists of two houses, called the senate and the house of representatives. In the theory of the constitution the senate represents the states, and the house of representatives the people, as in the United States. The senators in Australia are elected directly by the people.

Commerce and Industry. There are no native cattle, sheep, horses, or pigs. The main industry is the production of **wool**. General agriculture has long been the second industry, and **wheat** is grown for export. In recent years wines have become an important subsidiary industry. The soil of many districts, particularly in South Australia, Victoria and New South Wales, is suitable to the grape. The discovery of gold in Victoria first called attention to Australian minerals. Before this, copper and coal had been mined to some extent, but it was the sensational finds of gold in Victoria that induced the great stream of immigration. Since then large quantities of gold have been found in Western Australia, enormous deposits of silver at Broken Hill in New South Wales, and other metals elsewhere. Australia is now one of the great metal-producing countries of the world, both for precious and base, and the extent of the deposits, particularly in Queensland and North and Central Australia, is still imperfectly known. *Agricultural products:* wheat, oats, barley, corn, hay, potatoes, sugar-cane, beet-sugar, wine and fruit. *Mineral output:* gold, lead, silver, copper, zinc and tin. *Imports:* textiles, yarns, woolen, all other apparel (including shoes), bags and sacks, cotton piece-goods and other textiles, manufactures of metal, agricultural machinery, other machinery, iron and steel, plate and sheet, tinned plates, vehicles and parts, paper and paper boards, drugs, chemicals and fertilizers, oils and waxes, tobacco, alcoholic liquors, and sugar. *Exports:* wool, wheat, flour, skins and hides, tinned meat, butter, beef, copper ingots and bars, leather products, tallow, gold, sugar, jams and jellies, metal products, mutton and lamb, dry chemicals and fertilizers, milk, tin ingots, coal and zinc concentrates.

Communications. Government railways, miles open, 26,330. Private railways in commonwealth, open for general traffic, 935 miles. A transcontinental railway from north to south is under construction. The terminus of the northern territory line is now at Mataranha (264 miles from Port Darwin), while the existing line from Port Augusta to Oodnadatta now reaches Alice Springs.

Principal Cities. Melbourne, former capital; Canberra, the new capital of the Commonwealth, is a modern city in the Federal Territory; Ballarat, gold field center; Bendigo, quartz crushing; Sydney, capital of New South Wales with Port Jackson, one of the world's most convenient harbors; Parramatta in the orange district; Newcastle, coal mining town and place of coal export; Brisbane, capital of Queensland, important port; Adelaide, one of chief ports and capital of South Australia; Perth, capital of Western Australia; Fremantle, port for Perth; Albany, port; Hobart, capital of Tasmania, important port.

AUSTRIA

The Country. The Austrian republic consists roughly of the German-speaking portion of what was Austria in the dual monarchy of Austria-Hungary. The approximate area of the country is 32,352 square miles. A large part of the Alps lies in that part of western Austria called the Tyrol. Eastern Austria is in the valley of the Danube river and its branches.

Government. An assembly is elected by universal suffrage for four years, and a First Chamber is elected by the provincial diets. Seven of the eight provinces have an assembly of one chamber; the city of Wien, (Vienna), the eighth province, holds a special position in respect to local government.

Commerce and Industry. Agriculture predominates, but there is some forestry and stockbreeding. Manufactures include cottons, woollens, glass, woodwork, pianos, motor cars, etc. The country has not been deprived of all minerals and is producing lignite, anthracite, and iron ore in considerable quantities. Some copper, zinc, silver and

gold ore, lead and salt are also produced. Chief *imports* are coal, raw cotton, rubber, and iron goods. Weights and measures—metric system.

Communications. Although now a land-locked state, Austria was accorded free access by rail to the Adriatic. The Danube river is internationalized from the Ulm to the Black Sea. There are about 4,200 miles of railroads and an elaborate telephone system.

Principal Towns. Wien (Vienna), the capital; Gratz, Linz, Innsbruck, Salzburg, Wiener-Neustadt and Klagenfurt.

BELGIUM

The Country. Belgium is the most densely populated country in Europe, occupying an area of 11,755 square miles. In the Ardennes, which include parts of the provinces of Namur, Luxemburg and Liege, the average elevation is about 500 feet while the highest points attain an altitude of little over 2,000 feet. The country is well watered, but its two principal rivers, the Schelde and the Meuse, are Belgian only in part. Their affluents, however, are for the greater part held by Belgium and those of the Schelde are the more important of the two. Four-fifths of the land is under cultivation and more people are employed on the land than in all the trades, including mines.

Government. Belgium is a constitutional and hereditary monarchy. The legislative power is vested in the sovereign, the chamber of representatives and the senate, whose members are elected partly directly and partly indirectly.

Commerce and Industry. While Belgium is a great agricultural country, its prosperity is in scarcely less degree the result of industrial activity. The principal manufactures are rayon, linen, gloves, **lace**, **iron work**, locomotives and steam engines, motor cars, **arms**, bronze, **porcelain**, glass, etc. Belgium is rich in minerals including valuable zinc and coal mines. Metric weights and measures.

Communications. The railway system is the oldest on the continent, total mileage 5,960. About 3,000 miles of line are owned by the state. There are more than fifty canals, with a total length of over 3,000 miles, and five ship canals.

Principal Towns. Bruxelles (Brussels), the capital; Anvers (Antwerp), Liege, Gand (Ghent), and Malines.

Dependencies. *Belgian Congo* in central Africa, with an area of 918,000 square miles. This colony is of great importance to the mother country owing to its great yield of rubber, palm nuts and palm oil. Principal towns are Leopoldville, the capital, and Boma, the seaport.

BOLIVIA

The Country. The area of the republic of Bolivia is estimated at about 514,155 square miles, which figure, however, includes an area of approximately 100,000 square miles (the Chaco), which is also claimed by Paraguay. Cut off from direct access to the sea, it is the most sparsely populated of any of the South American republics. The northern part is the more inhabited, as it contains the Lake of Titicaca and many well-watered valleys around it. The southern and lower tableland is chiefly a desert.

Government. The president is elected by direct popular vote for four years; the chamber of deputies, 78 in number, also for four years, one-half the deputies retiring every two years; the senators, 28 in number, two for each department, are elected for six years, one-third retiring every two years. There are two capitals, an arrangement due to early local rivalries. La Paz is the seat of the executive and legislature. The supreme tribunal sits at Sucre, which is also the seat of the archbishop.

Commerce and Industry. The chief *imports* are provisions, hardware, wines and spirits, cotton, woolen, linen

and silk goods, and ready-made clothes. The chief *exports* are silver, tin and rubber. There is scarcely any food export. The metric system of weights and measures is in use.

Communications. Three railways descend from the highlands to the Chilean ports of Antofagasta and Arica, and to the Peruvian port of Mollendo, the total railway mileage being about 1,500 miles. Rubber and timber of the eastern forests are carried to the Amazon and Atlantic by Brazilian rail and river. Southern Bolivia has a rail outlet to the Argentine railway system. Notwithstanding the extensive navigable waters and a considerable extent of roads partly admitting slow motor traffic, internal communication is very defective.

Principal Towns. La Paz, the actual seat of government; Sucre, the capital; Cochabamba, Potosi, Oruro, Santa Cruz, and Trinidad.

BRAZIL

The Country. Brazil occupies more than half of the South American continent, an area of 3,275,510 square miles and is the largest of the South American republics. From north to south, the extreme measure of her territory is 2,630 miles; from east to west it is even greater. On the north and west are the great depressions of the Amazon and Paraguay rivers which comprise large areas of flood-plains and swamps, heavily wooded, and almost uninhabitable. The interior of the country is a high plateau with a general elevation of 1,000 to 3,000 feet, irregularly ridged by mountains and deeply cut by large rivers. The mountainous ranges of the maritime system form the eastern margin of this plateau. Brazil possesses three great river-systems—the Amazon, Plata, and San Francisco. The Amazon and its tributaries drain fully half of the country. The Plata system drains nearly one-fifth of the country through its three branches—the Paraguay, Parana, and Uruguay. Only the first of these is freely navigable for a long distance.

Government. The United States of Brazil constitute a federal republic, having a general resemblance to the constitution of the United States of America, but with one notable difference. The Brazilian states have severally the right of levying export duties—a concession to local sentiment. The country is divided into twenty states, one national territory, and one federal district, which includes the capital. The president is elected for four years by direct popular vote. The chamber of deputies contains 212 members; elected for three years. The 63 senators, three for each state and three for the federal district, are elected for nine years, one-third retiring every three years.

Commerce and Industry. Agriculture continues to hold first place in Brazil and the industries are related closely to agriculture. Brazil is the chief **coffee** producer of the world and the next natural product is **rubber**. Rice, cotton, sugar, tobacco, Paraguay tea and cacao are important products. Textiles amount to about forty per cent of the total manufactured articles. Both the forests and mines of Brazil are important. Gold is found and the greater part of the world's supply of monazite comes from Brazil. There has been lumber development in recent years. Pine has become an important export. Other exports are mica and talc, copper ore, platinum and rock crystal. The metric system of weights and measures is compulsory, but nevertheless certain local units are still used. Portuguese is the language.

Communications. About 20,000 miles of railways are open for traffic. While many of these are short lines connecting the several ports with towns in the interior, the entire system now joins the railways of Brazil with those of Uruguay, Argentina and Paraguay. The republic has over 10,000 miles of navigable waterways open to river

Austria: Rath Haus (City Hall) of Vienna.

Brazil: Santos, the ocean gateway of the World's greatest coffee land.

steamers and ocean-going vessels and 30,000 miles additional which are navigable for light-draft and flat-bottom boats only.

Principal Towns. Rio de Janeiro, the capital; São Paulo, São Salvador (Bahia), Recife (Pernambuco), Belem (Para), Porto Alegre, Niteroy, Fortaleza (Ceara), Manaus and Parahiba.

BRITISH EMPIRE

BRITISH ISLES

AND DEPENDENCIES IN EUROPE

The Countries. The British Isles comprise the United Kingdom, Northern Ireland, and the Irish Free State. The governmental functions of Northern Ireland and the Irish Free State are treated under these respective headings. The Kingdom of Great Britain and the Irish Free State have an area of 121,633 square miles. Within the small compass of the islands there is a considerable variety of topography. *Ireland* is largely an ill-drained plain, dotted with lakes and peat-bogs, and crossed by the sluggish Shannon. In the north-west and south-west respectively lie the mountains of Donegal and Kerry, while to the east lie the Wicklow Mountains, and the basalt plateau of Antrim. In Scotland three well-marked divisions stand out: the highlands, the southern uplands and between these two the central lowlands, into which four-fifths of the population is crowded. The lowlands contain the richest agricultural land, as well as the coal-fields. They are penetrated by three great estuaries, the Firths of Tay and Forth on the east, and of Clyde on the west, so that communication coast-wise or over-seas is everywhere easy. The *Welsh* upland is flanked to north and east by small coal-fields, but the greatest field, rich in steam coal and anthracite, lies to the south. A belt of limestone running from Bill of Portland to Tees Bay, and bearing at many points valuable iron ores, serves as a rough boundary of industrial *England*, for to the south and east of it, apart from the metropolis, agricultural interests predominate. Lying to the west of the limestone band, is the Devon-Cornwall peninsula, where great bosses of granite and slate build the famous moors. The Channel Islands, lying across the English Channel off the coast of Normandy, and the Scilly Islands, lying south-west of Land's End, enjoy an almost complete freedom from frost and severe weather.

Government. The government is vested in crown and parliament. *England* is united with Wales in a system of local government, for the purposes of which the country is divided into fifty administrative counties, in each of which the crown is represented by a local lord-lieutenant. County affairs are administered by justices of the peace and county councils. In certain matters, for instance, education, Wales and Monmouthshire have a distinct organization. There is also a Welsh board of health with headquarters at Cardiff. The *Isle of Man* as a governor appointed by the Crown and its own laws and government. For the general control of Scottish affairs by the government, there is a secretary for *Scotland*, who does not rank as a secretary of state. Certain British state departments, e.g., the home office and board of trade, have authority in Scotland, but for other branches of public work there are separate Scottish departments, these including education, agriculture, and health.

Commerce and Industry. The kingdom owes to its mineral wealth the basis of its prosperity. **Soft coal** of the finest quality underlies central England and Wales; **iron** abounds in the same regions, and in Scotland and Ireland; tin has been mined in Cornwall since pre-historic times, and zinc, copper, gold and silver, with a large range of non-metallic minerals, are also present. Fisheries are conducted on an extensive scale and furnish a large por-

portion of the food of the people. The climate favors the breeding of horses, cattle and sheep, and the development of certain breeds has greatly improved the livestock of the world. About half of the total area is devoted to agriculture but the total product is insufficient for home demands. The vast supplies of coal, the geographical situation, and the deficiency in agricultural resources, have combined to favor and force an industrial development. Great Britain maintains supremacy in ship-building and ranges among the greatest producers of iron and steel, machinery, metallic goods, textiles and leather goods. The majority of the population is employed in these industries, for which markets are found in all parts of the world.

Communications. There are about 20,000 miles of railways, and 4,700 miles of canals. The Manchester Ship Canal, opened in 1894, is 35½ miles in length and 28 feet in depth. The canal is in direct communication with all the principal railway systems and barge canals of the Kingdom. All the principal cities of Europe are accessible over established airways radiating from London.

Principal Cities. London, the capital, is the largest city of Europe; Edinburgh, the capital of Scotland; Dublin, capital of the Irish Free State; Glasgow, famous for its shipbuilding, general manufactures and great shipping trade; Manchester, the great cotton manufacturing center, connected with the great port of Liverpool by a ship-canal. Birmingham, Sheffield, and Wolverhampton, manufacturing centers for machinery, cutlery and hardware; Belfast, the capital of Northern Ireland, is the seat of the Irish linen trade and of shipbuilding interests; Leeds and Bradford, woolen centers; Bristol, a manufacturing and commercial port; Hull and Dundee, important fishing centers; Newcastle and the Tyne ports, coal exporters; Nottingham, noted for laces, curtains, boots and shoes; Cardiff and Swansea, the chief Welsh ports, exporting immense quantities of coal and ore.

BRITISH DEPENDENCIES IN AFRICA

The Countries. Consist of a number of colonies, protectorates, provinces, territories, islands and groups of islands, Northern and Southern Rhodesia, the self-governing Union of South Africa. The last and the independent kingdom of Egypt are described under their own headings.

Government. Constitution of British Empire is largely unwritten, but administration is based on three principles: self-government, wherever and whenever practicable, self-support and self-defense. The dependencies in Africa, apart from the self-governing Union of South Africa, are administered:

1. By legislative assembly, partly or entirely elected, and an executive council nominated by the crown, e.g., Mauritius.

British Empire: The Houses of Parliament, on the Thames Embankment, London. The building covers an area of eight acres. The dials on the clock are 23 feet in diameter, and Big Ben, the famous bell in the tower, weighs 13 tons.

British Empire: Tower Bridge, over the Thames, London. When a ship approaches the driveway splits in the center, and the two "bascules" swing up smoothly and easily, as if the two great towers were giants slowly lifting their arms - meanwhile foot-passengers can climb the towers and cross on the upper bridge.

British Empire: Giant's Causeway on the north coast of Ireland. It is made up of prismatic columns of basalt rock.

British Empire: Cantilever Bridge spanning the Firth of Forth, near Edinburgh, Scotland.

British Empire: A silk cotton tree, Bermuda

2. By a governor with executive and (or) legislative councils nominated by the Crown, e.g., Gambia, Sierra Leone, Gold Coast, Seychelles.

3. By a governor alone, e.g., St. Helena, Bechuana-land, Basutoland.

4. By governors or commissioners under the Colonial Office, with nominated advisory or executive councils, e.g., Nigeria, Kenya, Togoland, Tanganyika, Uganda, Zanzibar, Nyasaland, Somaliland, Swaziland.

In the protectorates and colonies, native kings and chiefs are encouraged to govern their own people, and native laws and customs are respected unless they conflict with justice or morality. Communications. Over 2,700 miles of canal, river, and lake navigation. Eight rivers over 1,000 miles in length including Mackenzie, St. Lawrence, Nelson, and Saskatchewan. Railway mileage totals about 41,000 miles, half of which is operated by the Dominion government.

CHILE

The Country. The republic of Chile, occupying the western coast of South America from 18° south latitude to Cape Horn, has an area of 290,119 square miles. The average width from east to west is only ninety miles and the length of the coastline is 2,485 miles. For about two-thirds of its total length, the Andean chain borders Chilean territory. In Tierra del Fuego, the loftiest peaks barely reach 7,000 ft., but the heights generally increase northward to Aconcagua, which exceeds 23,000 ft., the highest peak of the whole continent.

Government. Chile consists of sixteen provinces and two territories. The administration is highly centralized, the local authorities being controlled by the executive in the capital. The franchise has been liberalized and extended to all 21 years of age and over and able to read and write. Congress consists of a Senate of 45 members and a Chamber of 132 deputies. The President is elected by direct popular vote for six years.

Commerce and Industry. The varieties of Chilean products correspond to the immense geographical range. **Nitrates**, iodine, **copper**, iron, silver, gold, borax and lead from the northern provinces; coal, **wheat**, fruit, wine and pastoral products from central Chile; **timber** from the southern forests; meat and **wool** from the pastures north and south of Strait of Magellan. The chief exports are minerals and pastoral products. The metric system of weights and measures is obligatory.

Communications. There are in Chile 24,000 miles of public road, 850 miles of navigable river and 497 miles of navigable lakes. The length of State railway lines is 3,425 miles—that of private lines, 1,821 miles, making a total of 5,246 miles, including the Chilean section of the Arica-La Paz railroad.

CHINA

The Country. The Chinese Republic comprises the eighteen provinces of China proper, and the provinces of Manchuria, Mongolia, Sinkiang and Tibet. The total area of the republic is estimated at 4,277,170 square miles. China proper is a coastal plain formed by the alluvial valleys of the Hoang, Yangtze and lesser rivers. Manchuria has a similar character, but is separated from Chosen

(Korea) and the coast by mountains. Western China and Tibet are a mass of very high mountains containing the sources of all the great rivers of southern Asia.

Government. The republican government which followed the overthrow of the Manchu imperial line in the revolution of 1911 failed to enforce its will upon the military governors of the provinces. Civil war broke out in southern China in 1924 under the inspiring leadership of Dr. Sun Yat-Sen, culminated in the fall of Peking and a complete Nationalist victory in 1928. Peking was abandoned as the capital and renamed Peiping or Peping (Northern Peace). Nanking is the new capital. The provisional government consists of a President, a Central Political Council of 15, ten ministries and various committees.

Commerce and Industry. Silk is one of the most important of Chinese industries and exports. Another famous industry which originated in China is the manufacture of **porcelain**. The typical native industries still flourishing are lacquer-ware, enamel and cloisonne. Tientsin has a reputation for its carpets and rugs. Fireworks, mats and matting and palm-leaf fans are manufactured. Industries on a large scale are carried on at the open ports; cotton-spinning and weaving at Shanghai, sugar-refining at Canton, iron and steel works at Hanyang, docks, ship-building and engineering works at Shanghai and Hankow. Next to India, China is the largest **rice** producing country in the world. Home requirements prevent the exports from being very large. **Wheat**, cotton, corn and **tea** are being cultivated on a large scale and the only food material exported from China on a large scale is the **soya-bean** and its products. In **cotton** growing, China occupies third place in the world's countries. China possesses abundance of coal, including ample quantities of coal suitable for coking, which are found in the vicinity of iron ore deposits. Iron ore is not so plentiful as coal, but although geological research in China is still in its infancy, many deposits of high-grade ore have been located capable of yielding several hundred million tons. China also possesses an abundance of antimony, zinc and lead ores, quicksilver, copper, silver and wolfram ores.

Communications. China has some 8,000 miles of railways open including the foreign system on Chinese territory but much of the internal trade is carried on by means of the numerous canals and navigable rivers.

Principal Towns. Peiping or Peping, formerly Peking; Nanking, the capital; Hankow, Shanghai, Kwang-chow (Canton).

COLOMBIA

The Country. The republic of Colombia occupies the northwestern region of South America. Alone among the South American republics, Colombia has a coastline upon both oceans, its northern shores being washed by the Caribbean Sea, its western shores by the Pacific Ocean. The country lies wholly within the tropics, the equatorial line traversing its southern region. The area is estimated at about 440,846 square miles. The dominating feature of the whole country is the gigantic mountain-system of the Andes.

Government. The president, elected by direct popular vote for a term of four years, possesses large centralized power, particularly through the exercise of official patronage. The 68 senators are elected for four years and the 112 deputies for two years.

Commerce and Industry. Only a small section of the country is under cultivation. Coffee is the staple product. Tobacco is also grown; cotton, cacao, sugar, vegetable ivory, tagua (or vegetable ivory nut) and dyewoods are produced, besides wheat, corn, plantains, etc. **Banana** cultivation is increasing rapidly. The rubber tree grows wild, and its cultivation has begun. Tolu balsam is cultivated

and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena River but little or no wood of any sort is exported. The **Panama hat** industry is making great strides. Colombia is rich in minerals and gold is found in all parts. Other minerals, more or less worked, are copper, lead, mercury, cinnabar, manganese, **emeralds** and platinum. Nearly all the emeralds mined today come from Colombia. The iron works north-east of Bogota are important; in the immediate neighborhood of the works are coal, iron, limestone, sand, manganese and fireclay deposits. The **salt** mines north of Bogota are a government monopoly and a great source of revenue, supplying most of the interior departments. In several sections there are extensive deposits of coal and oil. The metric system of weights and measures is used.

Communications. Colombia cannot be said to possess a railroad system. The few railroads are detached lines uniting important towns to sea or river. The total length of the railroad systems is about 1,740 miles. The main channel of communications to the interior is the Magdalena River, whose mouth is blocked by an impassable bar.

Principal Towns. Bogota, the capital, at an elevation of 8,600 feet above the sea; Medellin, Barranquilla, Cartagena, an important mining center; Manizales and Bucaramanga, center of coffee production.

COSTA RICA

The Country. A Central American republic with an area of 23,000 square miles. Costa Rica is traversed from northwest to southeast by a chain of mountains (cordillera). The slopes of the mountains are heavily forested, much of the timber consisting of mahogany and other valuable cabinet woods.

Government. Legislative power is vested in the congress, a chamber of 43 deputies, elected by universal suffrage. The president is elected for four years.

Commerce and Industry. The principal industry is agriculture; **coffee** and **bananas** are exported in large quantities, as rosewood, cedar and mahogany; horses, pigs, sheep, and goats are raised in considerable numbers. Gold and silver are mined; and there are deposits of manganese. The metric system is in general use.

Communications. The country has about five hundred miles of railway including one transcontinental railroad. At Limon, there are excellent terminal facilities, with wharves so equipped with track facilities that loading and unloading can be carried on directly from the car to the vessel. At Puntarenas on the Pacific Ocean, the harbor has only fifteen feet of water at low tide, necessitating the handling of cargo by lighters. There are sixteen navigable rivers in the republic, the most important being the San Juan River and its tributaries, which are largely utilized for the transportation of the natural products. There are 2,740 miles of telephone lines in operation.

Principal Towns. San Jose, the capital; Cartago, Heredia, Limon, Puntarenas and Alajuela.

CUBA

The Country. Cuba, the largest and westernmost of the West India Islands, has an area of 44,164 square miles, (including the Isle of Pines and surrounding keys), its maximum length east to west is 730 miles and its width varies from 20 to 100 miles, its coast line being about 2,000 miles. It is generally mountainous, though considerable flatlands and marshy depressions extend along the south coast.

Government. Republic, modelled after the system of the United States, with a president, vice-president, senate and a house of representatives. The government of Cuba cannot

make a treaty with any foreign government endangering its independence, and the United States has the right of intervention and the use of naval stations.

Commerce and Industry. The foremost crops are **tobacco** and **cane sugar**, the former producing the finest leaf for cigars in the world. Other products are coffee, cacao, cereals, potatoes, market vegetables and fruits, bananas, guavas, oranges, grapes, etc. Cattle-raising in the central and eastern districts is an ancient and extensive industry. The *exports*, largely to the United States, are **sugar, leaf tobacco, cigars**, iron ore, cattle products, forest products and fruit. The *imports*, also largely from the United States, are meat products, iron and steel manufactures, wheat, lumber and timber products, coal and coke. Copper, iron and manganese mines are worked in the east, and limestone, clays and asphalt occur in useful quantities. Extensive forest lands yield mahogany, cedar and other valuable cabinet woods, dyewoods, gums, resins and other tropical forest products. Metric system of weights and measures.

Communications. Cuba has about 3,800 miles of steam railways and 250 miles of electric railways. Through trains run daily between Habana and Santiago and many branch lines from this main trunk connect the principal ports on both the north and south coasts with the interior. The railway system is being supplemented by an elaborate system of highways. On May 20, 1930, the 29th anniversary of the founding of the Republic, the New Cuban Central Highway between Habana and Pinar del Rio city in the west and Santa Clara in the east, total length, 700 miles, was formally opened. It traverses the capitals of all the Cuban provinces and will be connected by lateral roads with all important ports.

Principal Towns. Habana (Havana), the capital; Camaguey, Cienfuegos, Santiago, Guantanamo, Santa Clara, Matanzas, Manzanillo, Pinar del Rio, Sancti Spiritus, Trinidad and Cardenas. Coaling stations at Guantanamo Bay and Bahia Honda were leased to the United States.

It includes on the west the plateau of Bohemia and on the east the southern slopes of the Carpathians as far as the Danube and the Theiss. The rivers are, with two exceptions, the relatively useless upper courses, *i.e.*, of the Elbe, Oder, Vistula, etc. The exceptions are the Moldau (Vltava), which is entirely Bohemian and fragments of the course of the Danube on the south of Slovakia.

Government. The national parliament, which constitutes the only legislative body for the whole of the republic, is composed of a chamber of deputies elected by universal franchise without distinction of sex, for a period of six years and containing 300 members, and of a senate comprising 150 members to be renewed every eight years. The two chambers in joint congress elect the president of the republic for seven years. The constitution safeguards racial minorities to whom it assures the maintenance of their schools.

Commerce and Industry. The principal products of the mines are **coal, lignite, iron, gold, silver**, and graphite. Manufactured products include textiles, shoes, **gloves, glass, porcelain, sugar, metal goods, foodstuffs, toys, chemicals**, etc. Agriculture is highly developed and intensive farming is carried on. The beet-root is the foundation of an enormous sugar industry. Large quantities of fruit are exported. Forests comprise thirty-two per cent. of the whole area, the country ranking among the most richly wooded of Europe. Only metric weights and measures are used.

Communications. There are about 8,700 miles of railways, of which nearly 7,000 miles are owned by the government. There is no important continuous railway route from east to west; the majority of important lines simply cross the republic to connect German cities and ports with Vienna or Budapest. Traffic on the internationalized Danube is constantly increasing and the government is doing all in its power to develop the Danube ports. The Elbe and Oder are also internationalized and the Peace Treaty vested Czechoslovakia with the right to use certain terminal facilities in the German ports of Hamburg and Stettin.

The *Statsraadet* or cabinet consists of ministers who are individually and collectively responsible to the *Folketing*.

Commerce and Industry. The principal industries of the country have to do with agricultural pursuits. Beet-root, potatoes, barley, wheat, rye, oats and other cereals constitute the chief agricultural products of the country. Government. The Dominican Republic is nominally governed by a president elected for six years, and a national congress, consisting of a senate and a chamber of deputies, elected for four years. This system of government obtained until 1916, when the United States set up a government with naval officers at the heads of all departments. In October, 1922, plans for the withdrawal of the American Marines were completed in accordance with a proclamation of the military governor providing for ratification of the laws of American administration in the island, the provisional president to further the restoration of constitutional government through general elections, free from the intervention of military government. The withdrawal of the American military occupation was completed on the adoption of the constitution of 1924.

Commerce and Industry. The chief industry is agriculture, the products being **sugar**, tobacco, **cacao**, coffee and cotton. There are large forested tracts throughout the country, yielding enormous quantities of cedar, mahogany, satinwood and dye woods. **Cattle-raising** is extensively carried on and the minerals, although not exploited to any considerable extent, include gold, silver, platinum, quicksilver, coal, iron and rock salt.

Communications. In general, roads are bad in the interior and transport is difficult, but several trunk highways are now open; there are only 153 miles of railway in use.

Principal Towns. Santo Domingo, the capital; Puerto Plata, chief north coast port, and Santiago.

The Country. This South American republic is so named because the equatorial line runs through the country. Its western shores, 500 miles in extent, are washed by the Pacific Ocean. Its area is approximately 174,312 square miles including the Galapagos Islands, in the Pacific Ocean, 600 miles from Ecuador. This area is claimed upon Ecuadorean behalf, but full admission of Peruvian and Colombian claims to large tracts east of the Cordilleras would reduce this figure by approximately 100,000 square miles. It contains the volcanoes Chimborazo, Cotopaxi and others of great altitude. The most valuable and productive part of the country is the broad coastal plain.

Government. The president is chosen by direct popular election for four years. The 32 senators and 48 deputies are elected upon a limited franchise which is withheld from illiterates, an arrangement which secures ascendancy to the inhabitants of more or less white blood.

Commerce and Industry. The staple products of Ecuador are cacao and ivory nuts. Coffee is grown and largely exported. Other products are rubber, **tobacco** and **sugar**. Weaving of **Panama hats** is a considerable industry. Some gold is produced in the Andes. The legal system of weights and measures is metric.

Communications. Roads of the country are mostly bridle roads only, and often impassable for half the year. A railway is open from Guayaquil to Quito, 280 miles. Total length of the Ecuadorean Railways in operation, 698 miles. There are also a few short lines connecting important points. Various streams provide access from Guayaquil to a large part of the cacao-bearing region of the southern coastal strip. The lower reaches are navigated by river steamers, the upper waters by canoes and rafts. The Marañon River is navigable in its entirety.

Principal Towns. Quito, the capital; Guayaquil, chief port; Cuenca and Riobamba.

The British government proclaimed Egypt a sovereign state, having no connection with the British Empire, and enjoying the same status as any other sovereign state in the world. The British reservations, announced coincident with the withdrawal of the protectorate were: the security of British imperial communication; the defense of Egypt against attack; protection of foreign interests, and retention of Britain's interests in the Sudan.

Commerce and Industry. Chief industry: agriculture. The cultivable area is estimated at about 13,000 square miles. Grain, cotton and sugar are important products. Where, as in Lower Egypt, irrigation is perennial, two and sometimes three crops are secured each year. The date palm is an important growth, and limes, bananas, melons and olives are cultivated. Oil and tobacco are being exploited, and building stones, clays, gypsum, gold, manganese ores, natron, phosphate of lime, salt, alum, magnesite, and others developed commercially. The leading exports are textiles and yarns, cereals and vegetables, and tobacco.

Communications. The Nile is the great highway, and much travelling is done by boat. Exclusive of the Sudan military railway to Khartum, the state-owned railways have over 2,311 miles of track; private companies own over 850 miles of light railways. Since 1918 there has been direct railway communication between Cairo and Palestine. Length of Suez Canal, including approach channels, is 103 miles.

Principal Towns. Cairo, the capital; Alexandria, Port Said, and Ismailia, Tanta, Mansurah, Assiout, Damamhur, Medinet-el-Faiyum, Zagazig, El Minya, Suez and Damietta.

EL SALVADOR SEE SALVADOR ESTONIA

The Country. Estonia comprises the former Russian province of Estonia, the northern part of Livonia, the northwestern portion of the Pskov government and the Islands Ösel (Ezel) and Dagö in the Baltic Sea. Its area is 18,353 square miles. Except in the southeast which is hilly, the mainland lies low, much of which is swampy. There are many lakes and about half of Peipus Lake lies within it.

Government. According to the constitution of the republic, the sovereign power is assured to the people by means of the elections to the legislative assembly (*Riigikogu*, the state assembly), the referendum and the right of initiating legislation. The state assembly is composed of 100 members elected for three years on the basis of proportional representation and by universal suffrage. The executive power consists of the state head (*Riigivanem*, state elder), and ministers who form the government.

Commerce and Industry. Agriculture is the chief occupation of Estonia. Flax is one of the principal products and the live stock industry is flourishing. Oil-shale in rich quality is plentiful. Principal exports are timber, meat, dairy products and textile products. Manufactures include iron, steel, machinery, cotton, paper, wood pulp and spirits. Principal imports are salt, coal, fertilizers, foodstuffs, cotton, flax and machinery. Metric weights and measures.

Communications. Tallinn is an important port for the transit of the U. S. S. R. imports and exports. It is also the nearest winter port for Siberian produce. When Leningrad is closed by ice, most of that trade passes through Tallinn. There are about 1,200 miles of state-owned railroads.

Principal Towns. Tallinn (Reval), the capital; Tartu (Dorpat), the university town; Pernau, the port on the Gulf of Riga, and Narva, manufacturing town.

ETHIOPIA (ABYSSINIA)

The Country. A native kingdom of East Africa, separated from the Red Sea by Italian, French and British colonies; area about 350,000 square miles. It is mainly a plateau varying from 4,000 feet to 8,000 feet high. Minerals abound, including gold, silver, iron, rock salt, coal, copper and platinum.

Government. Ethiopia is an empire and its political institutions are essentially feudal.

Commerce and Industry. Ethiopia is an agricultural and grazing country varying in climate and products. In the south, cotton does well, while further north, coffee is indigenous. Sugar is grown in the south and oranges, indigo and bananas are abundant. The forests produce ebony, mahogany and other hard woods, as well as acacia and bamboo. In the northwest is a district famous for cattle. The exports mainly consist of coffee, skins and hides, bees-wax, ivory, rubber, butter and herbs.

Communications. The main avenue of trade is the French-Ethiopian Railway which runs from the port of Djibouti, in French Somaliland to the Ethiopian capital, Addis Abeba, a distance of 490 miles. In the west and north, goods are exported via Khartum.

Principal Towns. The principal towns are Addis Abeba, the capital; Harar, Adowa, Gondar, Ankober and Gambela.

FINLAND

The Country. Finland comprises the former Grand-Duchy of Finland to which was added through treaty with the Soviet government of Russia, the territory of Petsamo, giving outlet to the Arctic Ocean. The Åland Islands were awarded to Finland by the League of Nations. The total area of Finland is 132,510 square miles. The country consists of a great plateau, the southern half of which has about 25 per cent. of its area occupied by thousands of shallow lakes, many of them linked by short natural and artificial channels.

Government. Republic. The president is elected for six years and the cabinet consists of twelve members, and the house of representatives chosen by direct and proportional election. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached his or her twenty-fourth year. Every citizen entitled to vote is eligible to the house of representatives, which is elected for three years.

Commerce and Industry. Agriculture is the chief occupation of the people, although the cultivated area covers less than 9 per cent. of the land. A considerable part of the population along the coast gains its livelihood from fishing and considerable quantities of salt fish are exported to neighboring Baltic countries. Lumber is the main industry and the principal basis of the general prosperity of the country. Butter is also being exported extensively. Manufactures are well developed, mainly by help of water power. They include engineering, machine and shipbuilding, pulp and paper making, cotton goods and tanning. Metric weights and measures are used.

Communications. The southern half of the country is well served by railways which are linked with those of the U.S.S.R. and those of Sweden, total mileage being about 3,230. Most of the railways are owned by the state. Numerous canals connect the lake districts in the interior with the coast.

Principal Towns. Helsinki (Helsingfors), the capital; Tampere (Tammerfors), Turku (Åbo), Viipuri (Viborg) and Oulu (Uleåborg).

FRANCE

The Country. France is a republic of western Europe with an area, including Corsica, of 212,659 square miles.

Egypt: The Great Sphinx, like a gigantic sentinel still guards the cemetery of Gizeh. It has the body and paws of a lion, but its head is a portraite statue of King Khafre, who built it and placed it before his pyramid tomb.

The total length of the coastline is about 2,000 miles. The surface is diversified, but most of it is lowland, with a few level plains. In the center is a triangular plateau called the Auvergne Mountains, with a height of something over 3,000 feet. The Cevennes form the eastern edge of this plateau, and from them to the Vosges, the tableland continues. There is a mountainous area in Brittany, but the greatest heights are on the frontiers, the Jura separating France from Switzerland, the Pyrenees separating it from Spain, and the Alps separating it from Italy. The Ardennes in the northeast are less lofty. France has few lakes, but in the southwest, there are numerous lagoons. The Seine drains the north, the Loire and the Garonne the west, and the Rhone the east and south.

Government. France is governed by a president and a council of ministers who are responsible to a parliament of two houses called the national assembly. The president is elected by the assembly for seven years. He chooses the ministers, but his functions approximate rather to those of the English king than of the prime minister, although on ceremonial occasions he presides over meetings of the council of ministers. The ministers are the responsible heads of the various departments and it is not necessary for them to be members of the assembly for they can attend and speak in either house when necessary. They are responsible to the parliament and also for all the acts of the president. Their responsibility is collective. Their head is the prime minister who presides over their ordinary deliberations. The senate, or upper house, consists of 314 members. Of these, 225 are chosen by indirect election for nine years, one-third retiring every three years. The remaining 75 are chosen from among the other senators and sit for life. The senate sits in important cases as a high court of justice. The lower house or chamber of deputies, consists of persons directly elected by universal manhood suffrage. They are chosen for four years.

Commerce and Industry. First among the industries of France are fine textile products and the French have a worldwide reputation for fine silks, fine linens, and fine cloths. **Manufactured silk** is by far the largest export, though in 1929, the export of chemical products led that of silk by a small margin. Wine is, of course, prominent, but much more is imported than exported. French coal mines, of which the most productive are in the north, do not yield sufficient for the manufacturers' needs. The making of soap, cheese, and beet-sugar are important industries. The state maintains manufacturing and industrial monopolies in tobacco and matches. Certain explosives, but not dynamite or nitro-glycerine, are state products and the artistic manufactures of **Sevres porcelain** and **Gobelin** and Beauvais tapestries are famed for a higher quality than are the first-named monopolies. Iron ore, lead, zinc and silver are the chief mineral products. Fisheries and oyster culture form a large item in the wealth of the coast population. Agriculture is distinguished by thoroughness of cultivation, the land being divided into a multitude of small holdings. Only metric weights and measures are legal.

Communications. The total length of railways is about 26,000 miles of which about 6,000 miles are operated by the state. The canals of France are a most valuable auxiliary to the railways and are used regularly for transporting merchandise. There are over 3,600 miles of them actually navigated out of 3,620 miles in existence. French roads are excellent. Those of the first class, national roads, are looked after by the state. In the second class come the departmental roads, kept up by the local government authorities; and in the third class, district roads under the district councils. Paris is the center of a network of airways which covers France. Air lines radiating to all of Europe center at Le Bourget Air Port.

Principal Cities. Paris, the capital and metropolis; Marseille, the chief Mediterranean port; Lyon, a leading

industrial and commercial center; Bordeaux, an important port and coaling station on the Garonne River with a large export trade; Lille, center of important coal fields; Strasbourg, an important Rhine port in Alsace; Nantes, an important port on the Loire; Toulouse, a large manufacturing and market town; St. Etienne, a mining and manufacturing center; Nice, pleasure and health resort on the Riviera; Le Havre, an important port on the English Channel.

Colonies, Mandates, and Dependencies. France has the second greatest colonial empire of the world. Its colonies, dependencies, protectorates and mandates in all parts of the world, from which it derives a great part of its wealth and power, cover a total area of about 5,000,000 square miles. The French colonies and dependencies in Africa are: *French Equatorial Africa* with 912,049 square miles; *French West Africa* with 1,800,566 square miles; *Madagascar* with 241,094 square miles; *Mayotte* with 790 square miles; *Morocco* with 200,000 square miles; *Reunion* with 970 square miles; *Somali Coast* with 5,790 square miles; *French Togo* with 21,893 square miles; *Tunisia* with 48,300 square miles; *French Cameroon* with 166,489 square miles; and *Algeria* with 847,500 square miles (Northern Algeria, 80,117 square miles and Southern Algeria, 767,435 square miles); which, however, has not the status of a colony, but is politically an integral part of France proper.

The Colonial possessions and mandates in Asia embrace *Syria* with an area of 60,000 square miles; *Anam* with 39,758 square miles; *Cambodia* with 67,550 square miles; *Cochin China* with 26,476 square miles; *French Indochina* with 196 square miles; *Kwangchow-uan* with 190 square miles; *Laos* with 103,000 square miles; and *Tongking* with 40,530 square miles.

The insular possessions in America are represented by *Guadeloupe* with an area of 688 square miles; *Guiana* with an area of 34,740 square miles; *Martinique* with an area of 385 square miles, and *St. Pierre and Miquelon* with an area of 93 square miles.

Throughout the northern districts, the plain is scarcely broken; in the south there are several systems of hills and regions of great beauty. On the Bavarian border the highest point is 9,710 feet and there are many peaks between 4,000 and 8,000 feet. The rivers, in order of importance, are the Rhine, Elbe, Weser and Oder.

Government. Republic. The president, according to the constitution, is elected by direct vote of all citizens and holds office for seven years. Though the head of the German State is not, like the American president, also the chief executive, that post being held by the chancellor, who, like the British and French premiers, gets his support from a majority of the reichstag, he is the commander-in-chief of the military and naval forces, and can at will dissolve the reichstag. He can also refuse to approve laws passed by the reichstag and have them submitted to a popular referendum. The legislature of Germany (the reichstag) and of each of the constituent republics, is elected on the proportional system by the universal, equal, direct and secret votes of all voters of both sexes. Declarations of war and peace must be by legal enactment.

Commerce and Industry. About 90 per cent. of the area of Germany is agriculturally productive, the principal crops being wheat, rye, barley, oats, potatoes and beets. Forestry is an important industry, conducted by scientific methods under governmental supervision. Rye is the

cereal chiefly grown. Potatoes are produced in enormous quantities and sugar beets also. Vines are cultivated in many parts and the wines have a world-wide fame. **Coal, iron, copper, zinc, lead and potash** are mined. **Textiles** are largely manufactured in Saxony, Silesia and Westphalia. The chemical industry is of special importance. Metric weights and measures.

Communications. The total railway mileage is 38,000. The Rhine, Ems, Weser, Elbe and Oder form natural high-ways for water transport, all of which have been canalized to bring the inland areas into connection by barge with the North Sea and Baltic ports. From Magdeburg on the Elbe, a valuable system of east-west canals extends east to the Oder, near Frankfurt, and to the Vistula at Bydgoszcz (Bromberg), Poland. The Kiel Canal carries as much traffic as the Rhine. The Oder has been canalized to Breslau. In 1929 the principal operating Air Company carried about 125,000 passengers.

Berlin, the capital and one of the great railway centers of Europe; Hamburg, chief of the German Hansa ports; München (Munich), capital of Bavaria, with the famous academy of arts; Leipzig, chief city in the publishing trade; Dresden, capital of Saxony, noted for its picture galleries; Köln (Cologne), an important river port and center of coal fields and textile areas of the north; Breslau, an important market town at the head of the barge traffic on the Oder; Frankfurt (on-the-Main), a financial center; Düsseldorf, the river port for the industrial area of the Westphalia coal fields; Nürnberg, the chief railway center of Bavaria; Hannover, a market town and industrial center; Essen, with the Krupp works.

GREECE

The Country. Greece lies in the south of the Balkan peninsula, with a very long coastline on the Aegean and Ionian Seas, and a large number of islands. The area of Greece is about 49,900 square miles. It is generally mountainous. The mountains, though not very high, divide the country into a number of small districts between which communication is difficult. It is the sea which links up the different regions of Greece.

Government. A plebiscite held in April, 1924, determined that the monarchy should be succeeded by a republic. There is only one legislative chamber, the *Boule*, but a senate is provided for under the constitution of 1927. The chamber must be in session for at least three months every year and cannot transact business unless one-third of its members are present. There is a council of state, but its functions are judicial, not legislative.

Commerce and Industry. The forests are gradually disappearing, there is little pasture land, and the area available for cereals is small. Although wheat, corn, and barley are grown, the chief crop, especially in the west, is the **curren**t with which Greece supplies the world. **Olives, tobacco, oranges, lemons, figs** and nuts are important products. Rice is grown near Saloniki. Ores of manganese, iron, emery, copper, zinc, and lead are mined.

Communications. There are only about 1,990 miles of railways open for traffic, of which 884 miles are operated by the State. There are good steamer services on the long coastline.

GUATEMALA

The Country. A Central American republic with a long coastline on the Pacific and a short coastline on the

Caribbean Sea. It has a total area of 42,353 square miles. The surface is mountainous, except near the northeast coast where it is low-lying and marshy forest land. Several mountain ranges, mainly belonging to the Antillean system, traverse the country. The coastline is unbroken on the Pacific side and the only indentation on the Atlantic side is the Gulf of Amatique, an extension of the Gulf of Honduras.

Government. The legislative power is vested in a national assembly, consisting of representatives (one for every 30,000 inhabitants) chosen by universal suffrage for four years and a council of state of 7 members partly elected by the national assembly, partly appointed by the president of the republic. The president is elected for six years.

Commerce and Industry. The most important crops are coffee, plantains, sugar, **bananas, corn, rice** and potatoes. The cotton-growing industry is being developed. On the plateau horses, mules, **cattle, sheep, goats, and pigs** are reared in large numbers. Gold, silver, coal, lignite, manganese, copper, tin, lead, cinnabar, slate, alum, antimony, marble, alabaster, plumbago, asbestos, bitumen, porphyry, zinc and chalk are found, and opals and other precious stones also exist. The forests abound in valuable trees, producing mahogany, dyewoods, oak, pine and spruce wood. Metric weights and measures.

Communications. There are about 700 miles of railways. One transcontinental line and several minor lines are in operation. Most of the traffic is borne by mules.

Principal Towns. Guatemala, the capital; Quezaltenango, an industrial center; Coban, center of a coffee district, and Zacapa.

HAITI

The Country. The republic of Haiti, occupying the western portion of an island of the same name, has an area of 10,204 square miles. It is a land of mountains and valleys. The coast line is greatly indented on the west by the Gulf of Gonaive or Leogane. Several islands lying off the coast are subject to this republic. Torrid heat prevails on the lowlands but the climate is more equable in the higher regions.

Government. The republic, formerly a French colony, was proclaimed independent in 1804, and is now governed under a constitution ratified in June, 1918. The legislative and executive powers are exercised by a council of state, composed of 21 members appointed by the president. The president is now elected by the Council of State for six years, but cannot be re-elected. The United States provides a number of American advisers to the Haitian government in accordance with a treaty ratified in 1915.

Commerce and Industry. Nearly all the trade is with the United States. Logwood from the forests, excellent **coffee**, some cotton and cacao are exported. Most of the people depend on agriculture. Many minerals, gold, iron, copper, etc., are known to occur, but are little worked. Officially, metric weights and measures have been adopted.

Communications. Port au Prince is connected with Cap Haitien by a road 169 miles long and with Mirebalais and Las Cahobas by a road 33 miles long. Total mileage of railroads about 160 miles.

Principal Towns. Port au Prince, the capital with a large shipping trade; Cap Haitien, with considerable export trade.

HEJAZ

The kingdom of Hejaz was a creation of the World War. It was established in 1916 under a guarantee of independence from Great Britain in the event of successful rebellion against Turkey. In 1924 Husein, King of the Hejaz, abdi-

cated and his successor was driven from the country by Ibn Saud, the dominating power of central Arabia. In January, 1926, Ibn Saud entered Jidda, capital at that time of the Hejaz, and was proclaimed King of Hejaz and Sultan of Nejd. The estimated area of Hejaz is 150,000 square miles. It has a frontage on the Red Sea of 700 miles. It owes its importance to the holy cities of Mekka and Medina. From the latter the Hejaz railway runs north to Damascus, 1,105 miles.

HONDURAS

The Country. A Central American republic with an area of 44,275 square miles. The surface is mainly mountainous, especially in the west and southeast, interspersed with elevated plateaus, plains and valleys. The coastal regions are low-lying and swampy. The loftiest peaks are found in the volcanic ranges on the Nicaraguan boundary, rising to nearly 10,000 feet. Most of the rivers are difficult of navigation. The Gulf of Fonseca on the south coast, contains numerous islands.

Government. At the head of the government is the president, who, assisted by an executive council of five members, serves for four years. Legislative power is invested in a congress of deputies, also serving for four years, who are elected at the ratio of one per 15,000 inhabitants.

Commerce and Industry. Stock-raising is extensively engaged in. The chief agricultural product is **bananas**. Lemons, oranges, corn, rice, tobacco and coffee are also produced. The minerals include gold, silver, lead and copper, but the mining industry has not yet been extensively developed. Metric weights and measures.

Communications. There are about 1,065 miles of railways on the north coast. In general, travelling and transport are accomplished by means of mules and ox-carts, but the number of automobiles for mail service is increasing. Boats of 20 feet draft ply on the Ulua River. The government owns and operates the telephone and telegraph lines.

Principal Towns. Tegucigalpa, the capital and mining center; La Esperanza, Nacaome, and Santa Rosa; the ports of Amapala on the Pacific and Puerto Cortez on the Atlantic.

HUNGARY

The Country. Hungary is one of the states of Europe formed out of the old Austro-Hungarian Empire. It has an area of 35,911 square miles. It is almost entirely lowland. The shallow Lake Balaton is fed by springs, has brackish waters, and drains into the Danube.

Government. The titular head of Hungary is styled officially Protector of the Magyar State or regent; the state is to be regarded as a monarchy and the word royal is officially retained.

Commerce and Industry. The cultivation of the soil is the chief industry of Hungary. Except for lignite, there are no minerals and there are none but local industries. The Magyars still retain the bulk of the agricultural land, the products of which made Hungary the chief granary of the old dual empire. **Corn** and **wheat** are the chief cereals, although barley and oats are grown. **Horses** are reared in large numbers, and great efforts have been made to improve the breeds of cattle. Metric weights and measures.

Communications. Hungarian railways radiate from Budapest, the total mileage being about 5,400.

Principal Towns. Budapest, the capital and great railway center; Szeged (Szegedin), important trading center; Debrecen, chief city of the northeast; Keeskemet, an important agricultural and cattle market; Hodmezö-Vasarhely, an agricultural center.

ICELAND

The Country. An island of the north Atlantic, with an

area of about 39,709 square miles. Iceland is a great tableland averaging, 2000 feet above sea-level, of which a large portion is covered with lava fields or with enormous glaciers. Of its whole area barely a quarter is habitable. The surface is dotted by over 100 volcanic peaks. There are many boiling springs, and the geysers are world famous.

Government. The King of Denmark is also King of Iceland. It is, however, independent of Denmark, which is represented by a minister at Reykjavik. Denmark also takes charge of the foreign affairs of Iceland. The legislative body is the *Althing*, composed of a senate of 14 and a house of representatives of 28 members.

Commerce and Industry. Apart from sheep and cattle-raising, the principal industry is **fishing**. Herring abound, but the chief wealth of Icelandic waters consists of cod. Finbacked whales are hunted by the Icelanders and seals are numerous. Large quantities of **eider-down** and feathers are exported annually. The only minerals are lignite, sulphur and Iceland spar.

Communications. There are no railways in Iceland.

Principal Town. Reykjavik, the capital and largest city.

INDIA

The Country. The term British India includes the districts subject to British law, the area of which is 1,094,300 square miles. The Indian States or Agencies having political relations with the Indian Government have an area of 711,032 square miles, thus making the total area of India and Dependencies 1,805,332 square miles. The whole northern portion is mountainous, and includes the Himalayas, the loftiest mountains in the world, with Mt. Everest (29,002 ft.) and several others exceeding 25,000 feet. An extension of the western coast uplands crosses central India and forms the western and eastern Ghats. The Malay peninsula is formed by mountain ranges with broad lowlands along the coast.

Government. The sovereign of the United Kingdom is emperor of India. The chief authority is the secretary of state for India, who is a member of the cabinet of the United Kingdom, and is responsible to parliament. He has a council composed of from eight to twelve members representing Indians. In political and secret matters he can act without them. In India the government is committed to the governor-general-in-council, who has also the title of viceroy. He and the eight members of his council are appointed by the crown. The Indian legislature consists of a council of state and a legislative assembly, the majority of the members of both being directly elected by various constituencies such as the Mohammedans, Sikhs and Europeans. Each house also has appointed members in order that government may be directly represented, but some of these have to be non-officials. Each of the large provinces, except Burma, is governed by a governor who is advised by a council, while ministers look after the departments of state. In each province there is also a legislative council. The principle underlying the constitution is called "dyarchy." Broadly, it means that certain subjects are "transferred" to the control of the legislatures, central and provincial, while others are "reserved" in the control of the officials.

Commerce and Industry. Minerals of every sort occur in the mountains, and **coal** is abundant in east central parts. The aggregate output of gold is very great and constantly increasing, while the gem mines of Burma yield the greater part of the world's supply of rubies and similar precious stones. The tin and oil of upper Burma, and lead and copper in the Himalayas, are also important. The most valuable forest product is teak. Several breeds of cattle have been domesticated from wild stock. The fisheries supply a notable proportion of the food of the common people. Five-sevenths of the people are engaged

in agricultural pursuits, and irrigation is extensively developed. **Rice**, corn, **wheat**, **millet** and **sugar cane**, are the chief food crops; of these rice and wheat are exported. **Cotton**, **jute**, opium, **tea**, tobacco, **indigo** and oil-yielding seeds are also grown for export. **Cattle** are largely raised in the northwest, whence hides form a valuable item of export; camels, asses and horses in the north-western plains, and sheep, goats and yaks among the northern mountains. The manufactures are mainly yarns and cheap cottons, silks, largely from tussar (wild silk), cocoons, sugar, paper, rugs and blankets. Ship-building is extensively carried on. India imports manufactured articles, chief of which are cotton goods, metals, sugar, silk, woolen goods, machinery, railway equipment and oils.

Communications. There are about 40,000 miles of railways open. There are good metalled roads over most of India. Inland steam navigation is well established on the lower courses of the main rivers.

Principal Cities. Calcutta, the principal port of the east coast; Madras, the great cotton manufacturing and shipping port of the south; Bombay, the principal financial center; Delhi, the capital; Karachi, the port of the western region. There are thirty-three other towns exceeding 100,000 inhabitants, and forty-four more with over 50,000 inhabitants each. Important towns, including several native capitals, are Hyderabad, Lucknow, Rangoon, the capital of Burma; Benares, Lahore, Cawnpur, Agra, Ahmadabad, Mandalay, Allahabad, Amritsar, Jaipur, Bangalore, Howrah, opposite Calcutta; Poona, Patna, Bareilly (Bareilly), Nagpur, Srinagar, the capital of Kashmir; Surat, Meerut, Madura, Trichinopoly and Baroda.

IRAQ (MESOPOTAMIA)

An independent kingdom formerly under mandate of Great Britain. Mandatory rights were renounced by treaty of June, 1930, and full independence of Iraq recognized. Treaty to come into force as soon as Iraq is admitted to League of Nations. The country lies between the rivers Tigris and Euphrates. It is a land of great potentialities, owing to its oil-wells and its rich soil, which is being developed by means of irrigation. Principal towns: Baghdad, the capital and Basra, the seaport at the head of the Persian Gulf.

IRELAND, NORTHERN

The Country. The present Ulster border was determined by the Government of Ireland Act in 1920, which contemplated the division of Ireland between a nationalist south and a unionist north. For centuries Ireland had been geographically divided into four provinces: Ulster, Munster, Leinster and Connaught, of which the first is predominately unionist, and the remainder nationalist, the latter term being used to include Sinn Féin. But upon closer examination the framers of the act discovered that three of the counties of Ulster, namely, Donegal, Monaghan and Cavan, contained a population with a considerable majority of nationalists. These counties were therefore included in Southern Ireland, and the Ulster border became the lines circumscribing the remaining six counties of Ulster. Area of Northern Ireland, 5,240 square miles.

Government. Under the Act of 1920 the government of the territory comprising the six counties of Down, Antrim, Londonderry, Armagh, Tyrone and Fermanagh is intrusted to a parliament "consisting of His Majesty, the senate of Northern Ireland, and the house of commons of Northern Ireland." The powers of the parliament and government of Northern Ireland are wholly domestic. The ministry of commerce of Northern Ireland assists in the

development of new markets and encouragement of export trade. So far as foreign policy and affairs are concerned Ulster remains essentially a part of the British unit. Therefore her foreign credit remains on a par with that of Great Britain. Her representatives abroad are the British representatives.

For description of physical features, principal towns, etc., see under British Isles.

IRISH FREE STATE

The Country. For demarcation of territory, see under Northern Ireland; for physical features, see under British Isles. Area of Irish Free State, 26,600 square miles.

Government. The constitution of the Irish Free State gives the people those powers to govern themselves possessed by the peoples of Canada, Australia, South Africa and New Zealand. Unlike the cases of these self-governing dominions, however, the constitution of the Swiss Republic rather than that of Great Britain was used as a model in framing the organization through which these powers are to be exercised. The British and dominion system of government by a cabinet composed exclusively of members of the dominant party in parliament is replaced by intrusting the carrying out of the will of the elected majority to an executive council, in which only a minority of the members are drawn from the ranks of politicians. The similarity to the Swiss constitution extends also to an arrangement included, whereby legislation can be initiated by referendum. Article XI says: "The rights of the state in and to natural resources, the use of which is of national importance, shall not be alienated. Their exploitation by private individuals or associations shall be permitted only under state supervision and in accordance with the conditions and regulations approved by legislation." Another important point is the immunity Ireland is to enjoy from embroilment in British quarrels. Article 48 provides that, save in case of actual invasion, the Irish Free State "shall not be committed to active participation in any war," without the assent of the Free State parliament.

For description of principal towns, see under British Isles.

ITALY

The Country. Italy consists of the Apennine peninsula, the peninsula of Istria, and the islands of Sicily and Sardinia. The area, including the new territories added to the kingdom, comprises about 119,710 square miles. The Apennines, extending southward from the Alps, form the backbone of the peninsula, the southern and western parts of which have been subjected to volcanic eruptions; and Vesuvius, Etna and Stromboli are still active volcanoes. The Alpine lakes are long and narrow, and the lakes of central Italy are in the craters or pipes of extinct volcanoes. The principal rivers are the Adige, 230 miles in length; the Arno, 150 miles; the Po, 420 miles; and the Tiber, 250 miles.

Government. Constitutional monarchy; the executive power is vested in the king, but is exercised through responsible ministers. Law-making power is the joint prerogative of king and parliament, the latter consisting of a senate and a chamber of deputies. Resulting from the Fascist revolution, according to the law of December, 1928, the "Grand Council of Fascism" was formed, the supreme body which controls all the activities of the regime. It designates the deputies for the lower chamber and must give its opinion on all bills dealing with constitutional issues. The king nominates the senators for life, the deputies are elected on a restricted manhood suffrage.

Commerce and Industry. Italy is predominantly agricultural; one-fifth of the area is forested and many portions of the lowlands cannot be cultivated on account

India: The Taj Mahal, at Agra, is not only the most beautiful tomb in the world, but one of the world's most famous works of architecture. Its name means "gem of buildings."

India: The Maharaja's Palace at Jaipur. This is the only city in India that is laid out in rectangular blocks.

In addition, it exercises a mandate of the League of Nations over the former German colonies in the Pacific, north of the equator. The area of the mainland and adjacent islands is 147,652 square miles. Bays and inlets are numerous and there are many natural harbors, especially on the Pacific side. The chief feature of the Empire is its mountainous character, for each island has a mountainous backbone. Among the higher mountains, several extend above the snow line. Fujiyama, the sacred mountain of Japan, is the highest and reaches 12,245 feet. The Yodo, one of the longest streams, empties into the Bay of Osaka. One of the most notable physical features is the Inland Sea or Japanese Mediterranean, which reproduces, on a smaller scale, the same features as the larger Sea of Japan. It is almost entirely landlocked and surrounded by chains of volcanoes of which few are now active. The climate is temperate and healthful with abundant rainfall.

Government. The government is in the hands of the emperor. He is assisted by cabinet ministers whom he appoints and who are responsible to him. There is a privy council which is consulted on important occasions but the executive power rests with the emperor. Laws are made under his sanction by the imperial diet which consists of two houses, a house of peers which has 407 members and a house of representatives of 464 members, elected by general manhood suffrage.

Commerce and Industry. Agriculture is the chief industry, but only about 20,000 square miles of Japan proper can be cultivated; of this 57 per cent is under **rice**, and 33 per cent under wheat. **Tea** plants are produced on nearly 200 square miles. Over 3,000,000 households are occupied with the production of **silk**, the yield of raw silk equalling that of the whole of Europe and about 75 per cent of the silk is exported. Tobacco, soya beans and fruit are extensively produced. Over 2,000,000 men are engaged in fishing. Coal, copper, phosphate and zinc are mined. Chief manufactures are textiles, silk, earthenware, glass, lacquered goods, matting and hemp. Trade in matches and paper is important. A large amount of timber is pro-

duced. **Imports** are chiefly raw cotton from the United States, India and China; and wool from Australia.

Communications. The whole country is covered with a network of railways with a total length of nearly 10,000 miles, and it is possible to travel from the extreme north of Hokkaido (Yezzo), to the extreme south of Kyushu without once leaving a railway station except to cross the Straits of Tsugaru and Shimonoseki, where special steam ferries are provided. The Japanese government subsidizes shipping companies for foreign trade and Japanese vessels run on four great routes to Europe, North America, South America and Australia.

Principal Towns. Tokyo, the capital and great industrial center; Osaka, seaport and textile manufacturing city; Kobe, seaport with extensive shipbuilding; Kyoto with silk, porcelain and lacquer goods factories; Nagoya, port with large textile industries; Yokohama, port of Tokyo; Nagasaki, a seaport and winter resort.

The most important of Japan's dependencies are *Chosen* (Korea), with an area of 85,229 square miles, from which Japan takes the surplus rice crop and the bulk of the raw cotton; the island *Formosa* (Taiwan) with 13,471 square miles; *Karafuto*, the southern part of *Sakhalin* with 13,245 square miles; and the former German colonies in Oceania awarded by the League of Nations as mandates to Japan, viz.: *Caroline Islands*, *Marianas Islands*, *Marshall Islands* and *Palau Islands* with a total area of 1,133 square miles.

MEXICO

The Country. Mexico has an area of 767,198 square miles. Two mountain chains traverse the republic, forming between them a number of valleys and plateaus. The plateau of Anahuac, on which the capital is situated, is the largest and most important. The eastern edge of the plateau is formed by the Sierra Madre Oriental. On the western edge of the plateau, the Sierra Madre Occidental shows a steep front and narrow ridges broken by canyons; in both Sierras the highest peaks are about 10,000 feet. At the southern edge of the plateau, confused ranges of mountains fall sharply to the Isthmus of Tehuantepec, where the lowest point on the watershed between the Atlantic and Pacific is a little over 700 feet. The physical divisions eastward of the Isthmus of Tehuantepec include the highlands of Chiapas, and the narrow low plain of Soconusco on the Pacific side. These highlands range from 6,000 to 8,000 feet in extreme elevation. Northeast of them is the peninsula of Yucatan.

Government. Mexico is a federative republic, divided into states, each of which has a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the supreme government are divided into the legislative, executive and judicial. The legislative power is vested in a congress consisting of a house of representatives and a senate; and the executive power, in a president. Representatives are elected for two years by universal suffrage. The senate consists of fifty-eight members, two for each state, and are elected in the same manner as the deputies. Mexico is divided into twenty-eight states, one federal district and two territories.

Commerce and Industry. Mexico is a country of immense natural wealth, with its *oil fields*, its gold, silver, copper, iron and other minerals and the great variety of vegetable products determined by the wide range of elevation and climate. Among these last may be specially mentioned hemp, bananas, logwood, and other tropical forest products of the southeast; coffee, tobacco and cotton of more northerly localities, with a variety of fruit and all usual grain crops. The most interesting development in resources of Mexico in recent years has occurred in the oil industry. In spite of inadequate transportation facilities, the Mexican oil fields have been able to take a high place among the petroleum-producing territories of the world. Its vast oil reservoirs have scarcely been tapped. Coal is mined in the state of Coahuila. Large quantities of sugar, molasses and spirits are also produced.

Communications. Mexico has in operation about 19,000 miles of railways, most of which are owned by the government. Through connections to the United States can be made at the following six border points: Nogales, Ariz., El Paso, Tex., Laredo, Tex., Presidio, Tex., Eagle Pass, Tex., and Brownsville, Tex. A railway service from Vera Cruz and Mexico City to the frontier of Guatemala has also been completed. Puerto Mexico, on the Atlantic and Salina Cruz on the Pacific are connected by the Tehuantepec railroad.

NETHERLANDS

The Country. The area of the country, about 13,220 square miles, is for the most part flat, much of it lying below the level of the water, salt and fresh. Along the canals, the meadows are often ten or twelve feet below the water-line, and between the land and sea at high tide, there may be a difference of twenty-five feet or more. The land is protected by embankments and dikes and it may be pictured as a great trough, the floor of which slopes down from east and southeast toward the North Sea in the west and north. The rivers which flow across this country from the higher continent beyond, are, at their mouths, frequently below the level of the sea into which they have to be lifted by canals and locks across the dams or dikes. At all times the precarious river levels threaten internal floods. On June 14, 1918, a law was passed for the purpose of forming a new province by the draining of the Zuider Zee to the extent of 523,000 acres. The work, started in 1924, is expected to take 15 years.

Government. Constitutional monarchy. The executive power is vested in the sovereign with nine ministers in council, the legislative authority being the sovereign and states-general, which consist of two chambers, the first of 50 members elected for nine years and the second of 100 deputies elected for four years. There are eleven provinces, sub-divided into communes.

These colonies are governed by a governor-general who has the right of passing laws and regulations for the administration of the colony, so far as his power is not re-

served to the legislature of the mother country. The principal products of Dutch East Indies are sago, corn, rubber, tapioca, coffee, tobacco, tea, copra, and oil-seed.

The *Dutch West Indies* are *Curacao*, with 403 square miles, lying just off the mainland of Venezuela, South America and *Surinam* (*Dutch Guiana*), with 54,291 square miles, on the north coast of South America, producing coffee, cacao, bananas and balata.

It is 1,160 miles in length and the coastline, excluding minor indentations, is over 2,100 miles long. It is separated from Sweden by the Kjolen Mountains, which form the backbone of the peninsula. These mountains rise in many parts to over 6,000 feet, the highest peaks being over 8,000 feet. Norway's long coastline facing the Atlantic is edged with lofty cliffs and seamed with deep fjords. Islands, countless in number, fringe the coast. These archipelagos cover a total area of no less than 8,600 square miles. Seventy per cent of Norway's area is barren land—mountain, moor, or glacier—uninhabitable by man. Of the whole area of 125,086 square miles only 3,500 square miles are fit for agriculture and nearly 3,000 square miles are water. The rivers are short and torrential, but provide the finest salmon fishing in Europe. Its comparatively mild climate is due entirely to the influence of the ocean. *Svalbard (Spitzbergen)* and adjacent islands, with total area of 25,000 square miles and rich coal fields, is under the sovereignty of Norway.

Government. A constitutional monarchy. Parliament, called the *Storting*, consists of an upper and a lower house, having in all 150 members, one-quarter forming the *Lagting* or senate, three-fourths the *Odelsting* or house of commons. Questions relating to the laws are considered by each house separately, but if the two houses do not agree they resolve themselves into a common sitting for discussion and a two-thirds vote is then required for decision. Members are chosen by universal suffrage, without distinction of sex.

Commerce and Industry. Agriculture is practiced only in Eastern and Southern Norway. The chief crop is oats; barley, rye, and potatoes are also cultivated. The hay harvest is large and important. PERU

The Country. A South American republic with an area of 632,047 square miles. The Cordilleras of the Andes divide Peru into three natural divisions. The first lies between the coast and the Maritime Cordillera, and consists for the most part of desert. By means of irrigation, much of this desert is now cultivated. The second lies between the Maritime and Central Cordillera, and consists of grass-clad uplands, suitable for the rearing of cattle and sheep. Farther east in the mountainous regions between the Central and Real Cordilleras, there are huge mineral resources, untapped for the most part.

Government. The legislative power is vested in a senate of 35 members and a house of representatives of 110 members elected by direct vote and renewed totally every five years. These two mountain railways with their extensions, together traverse about 900 miles. The total length of the Peruvian railroads is 2,798 miles. But much of the transport in the mountains is still carried by troops of llamas driven by Indians. The river port of Iquitos, 2,300 miles from the Atlantic, is visited by ocean steamers. This great tableland is enclosed by the Cantabrian Mountains and the Pyrenees on the north and the Sierra Morena on the south. Outside the plateau lie the highest summits of the whole country, the Pic de Nethou in the Pyrenees being over 11,000 feet. The plateau itself is traversed by four mountain ranges which separate the valley of the Ebro from that of the Duero. All the considerable rivers except the Ebro flow westward to the Atlantic.

Government. Spain is a constitutional monarchy and legislation is vested in the king and the cortes (senate and congress). The senate consists of not more than 360 members; the congress of deputies in the proportion of one to every 50,000 of the population. Voting is compulsory.

Commerce and Industry. Spain is largely an agricultural country. Wheat, barley, maize, rye, oats and rice are the chief crops; the annual production of red and white wines exceeds 700,000,000 gallons, and of olive oil 385,000 tons. Silk culture and stock raising are important branches of industry. Coal, iron, copper, lead, zinc, mercury, iron pyrites, and lignite are mined. The chief imports are raw cotton, machinery, coal and coke, chemical products and fish; the chief exports are metals and mineral ores, wine, olive oil, oranges, cotton and manufactures, and cork.

Communications. Total length of railways is about 10,000 miles, owned by private companies, but nearly all subsidized by the government.

Principal Towns. Madrid, the capital; Barcelona, the chief seaport, on the Mediterranean; Valencia, important center of tobacco and pottery; Sevilla (Seville), a thriving port and chief city of Andalusia; Malaga, an important seaport and health resort; Saragossa, capital of the former kingdom of Aragon; Cartagena, fortified seaport on the Mediterranean.

Colonies and Dependencies. The former great colonial empire of Spain is now considerably reduced. All colonies are in Africa and occupy a total area of about 139,000 square miles. They consist of *Spanish Morocco* with about 18,300 square miles, with the fortified towns of Ceuta and Melilla; *Ifni*, 965 square miles; *Rio de Oro*, 109,200 square miles; and *Spanish Guinea*, including *Fernando Po* and other small islands, 10,830 square miles.

SWEDEN

The Country. Sweden, occupying the eastern and larger portion of the Scandinavian peninsula, has an area of 173,156 square miles. The length is nearly 1,000 miles and it has a coast line of over 1,500 miles. Besides the large number of small islands which fringe the coast, Sweden includes the two large Baltic islands of Gotland and Oland. Her islands cover an area of 3,000 square miles. The whole country is a tableland sloping from the Kjolén range to the Baltic. No less than 8 per cent of the surface of Sweden is water, the immense number of lakes covering 14,000 square miles. The two largest are Wenner and Wetter, in the southern portion of the country, and are connected by an excellent system of canals.

Government. Sweden is a constitutional monarchy, the king's power being exercised in conjunction with a council of state and a diet. There are two chambers, the first of 150 members and the second of 230.

Commerce and Industry. Principal crops are oats, potatoes, barley, rye and wheat. Live stock are produced in great number. A large amount of butter is exported. Forests of pine, fir and larch cover more than half of the area, and her output of timber and paper pulp is very large. The mining of iron ore and the production of iron and steel is of utmost importance. Cream separators, matches, lighthouse apparatus, telephone supplies, motors and many kinds of electrical machinery are among the highly specialized products of industry. Porcelain factories and the glass factories produce wares that have achieved a high reputation in the markets of the world. Metric weights and measurements.

Communications. Sweden has about 10,000 miles of railway supplemented by an excellent system of canals. Steamer communication is kept up on the internal waterways along the coast during the open season.

Principal Towns. Stockholm, the capital; Göteborg, the chief seaport; Malmö a seaport opposite København, Norrköping, an important manufacturing town.

SWITZERLAND

The Country. Switzerland, an inland mountainous country in the central portion of the Alps, has an area of 15,940 square miles. The northwest of the country bounding France and Germany consists of some of the parallel ridges and valleys of the Jura Mountains. Between Lake Constance on the Rhine and the Lake of Geneva on the Rhone are the Lakes Neuchâtel, Zurich, Lucerne, Brienz, Bienne, etc., which all drain to the Aar. Lake Geneva and Lake Constance each exceed 200 square miles in area; Lake Neuchâtel covers 93 square miles. Owing to its elevation, much of Switzerland is under permanent snow.

Government. Switzerland is a confederate republic of twenty-two cantons. The parliament consists of the state council (44 members) and the national council (198 members). The federal assembly, which consists of both chambers, is the supreme authority. The referendum is used when legislative measures are submitted directly to the people. The separate cantons have an independent system of local government.

Commerce and Industry. The thousands of tourists who visit Switzerland have made hotel-keeping one of the principal industries of the country. Silk, cotton and textile mills employ thousands; the manufacture of machinery, clocks, and watches; and dairy farming are the most important economic factors of Switzerland. Large quantities of milk are consumed in chocolate factories and milk-condensing concerns, and in the manufacture of cheese for export. Metric weights and measures.

Communications. About 3,500 miles of railways are in operation, a large portion of which is electrified.

Principal Towns. Zurich, great industrial center; Basel, manufacture of silk ribbons; Bern, the capital; St. Gall (St. Gallen), industrial center south of Lake Constance; Lausanne, educational center; Genève, (Geneva) headquarters of the League of Nations, and noted for its watches; Lucerne, great tourist center.

TURKEY

The Country. Turkey, now reduced in size to about 294,416 square miles, comprises a portion of Thrace adjacent to Istanbul (Constantinople) and is now mainly confined to Asia Minor, a peninsula of southwestern Asia. This peninsula from north to south varies in length from three to four hundred miles and from east to west is about eight hundred miles. Much of the district is an elevated plateau, the altitude varying from 6,000 to 2,500 feet above the sea. Among the chief mountains are the Taurus

Chains, stretching across the south of the country from the southwest shore of the Aegean to the north of Syria, their principal peaks reaching from 7,000 feet to 10,000 feet; the Bulgar Mountains are upwards of 10,000 feet and the Ala Mountains, north of Adana, are 8,000 to 10,000 feet high. Between the mountains on the north and on the south are several chains, from one of which, near Kaisarieh, soars Mount Argæus, 13,100 feet and the highest peak in Asia Minor. Flowing into the Black Sea are the Chorok, the Yeshil Irmak, the Kizil Irmak (Halys) and the Sakaria. Into the Mediterranean flow the Sihun and the Jihun. In the east of Asia Minor are the headwaters of both the Euphrates and the Tigris as well as of the Aras (Araxes). The lakes are the Tuz, 60 miles long; the Kirli, 30 miles long; the Eyerdir, 30 miles long, in Anatolia; and Lake Van, 80 miles long.

Government. Constitutional republic with national assembly elected by the people and a council of ministers appointed by the president. The executive power is entrusted to a cabinet responsible to the assembly.

Commerce and Industry. Agriculture is primitive, but the soil, where cultivable, is fertile and produces considerable crops of wheat, **barley**, cotton, **tobacco**, nuts, **figs**, olives, grapes and other fruits. A large quantity of opium is grown. The *exports* include cereals, cotton, fruit, olive oil, tobacco, carpets and wool. Asia Minor is rich in minerals, which, however, are only slightly worked. The fisheries are of importance.

Communications. 3,238 miles of railways are in operation. The so-called Baghdad Railroad extends from the Bosphorus, via Adana and Aleppo, to Nisibin.

Principal Towns. Istanbul (Constantinople), the former capital; Izmir (Smyrna), an important seaport; Brusa, the ancient capital and center of silk manufacture; Sivas, a mining center; Ankara (Angora), the capital.

UNION OF SOUTH AFRICA

The Country. The Union of South Africa is a self-governing dominion of the British Empire; area, 471,917 square miles. The Union of South Africa consists of the four provinces: the Cape of Good Hope, Natal, Transvaal and Orange Free State. South Africa is a vast tableland with a lofty rim to the east and south, represented by the Drakensberg and other mountains. The main drainage is carried west by the Orange and Vaal Rivers. The Cape region has a vegetation of evergreen trees, shrubs and heaths; the well-watered eastern terraces are clothed with a rich wooded savannah, with palms on the coastal belt; over vast acres of the eastern tableland there is an almost treeless grassland, the veldt, which merges westwards into scrub and bush, composed of thorn bushes and other drought-resisting plants. In the north the grassland is wooded, and is known as the bush veldt. *Southwest Africa*, formerly German, with an area of 311,820 square miles, is now administered by the Union under a mandate from the League of Nations.

Government. Under the act constituting the Union, the sovereign appoints a governor-general, who, with an executive council, administers the executive government of the Union. Departments of state have been established, the governor-general appointing officers to administer them. Legislative power is vested in a parliament consisting of the king, a senate and a house of assembly. The senate consists of 40 members, 8 being nominated by the Governor-General, and 32 elected. The house of assembly has 148 members. There must be a session of parliament every year.

Commerce and Industry. The most important cereal crop is **corn**. Tobacco is widely grown. The leading pastoral occupation is **sheep** raising. Dairy farming is very successful in Natal on the higher and cooler eastern terraces and in similarly situated parts of the Cape prov-

ince. **Ostriches** are reared. The mineral wealth is enormous; of this, **gold** represents considerably more than half. Ranking second to the gold mines as regards the monetary value of their output are the **diamond** mines. Coal is mined in the Transvaal and Orange Free State. Among metals of secondary importance are **copper** and **tin**. The Union is now the world's largest producer of **corundum**, and has valuable asbestos mines. As regards manufactures, the products include biscuits, jams and preserves, beer, cement, soap, candles, matches, furniture, leather, boots and shoes, explosives, chemicals, **tobacco**, vehicles and so forth.

Communications. The whole transport system of South Africa—railways, ports and harbors—is owned and managed by the State. There are 13,419 miles of railway.

Principal Towns. Johannesburg, the center of the densely populated gold mining region; Cape Town, the premier port of South Africa; Durban ranks second, and is the principal port for Johannesburg; the nearest port to the latter city is, however, Delagoa Bay (Lourenço Marques), which takes a certain portion of the Transvaal trade; Pretoria, the capital, Port Elizabeth and East London.

UNION OF SOVIET SOCIALIST REPUBLICS

The Country. The former Russian Empire extended from the Baltic Sea to the Pacific Ocean and from the Black Sea to the Arctic Ocean, stretching nearly half way around the globe and including an area of 8,500,000 square miles. Of this area it lost about 300,000 square miles to Finland, Poland, Latvia, Lithuania, Estonia, which have been recognized as independent countries and Bessarabia, which was annexed by Rumania. The official name of Russia is now *Union of Soviet Socialist Republics*, with an area of 8,241,910 square miles. It is a federation of seven constituent Soviet Socialist Republics: (1) The Russian Federal Republic, including most of Siberia, (2) White Russian Republic, (3) Ukrainian Republic, (4) Transcaucasian Federal Republic, (5) Turkoman Republic, (6) Usbek Republic, and (7) Tajik Republic.

Included in the above are three (minor) Soviet Socialist Republics, fifteen Autonomous Republics and fifteen Autonomous Areas. The European part of U.S.S.R. is mostly a plain, and nowhere does the land rise to heights exceeding 1,200 feet; only in the fringing Caucasus, Crimean heights and Urals are there peaks exceeding 5,000 feet; for roughly 200 miles north of the Caspian Sea, the land is below sea level. Nearly all the most useful rivers radiate from the Valdai Hills, the central boss. Of them the greatest is the Volga, which flows east to Kazan and south to the Caspian, receiving the Kama set of tributaries from the Urals. The Don and the Dnieper flow to the Black Sea, the Dvina to the Baltic Sea across Latvia, and the Volkhof to Lake Ladoga, which drains by the Neva to the Gulf of Finland.

Government. The supreme organ of authority is the All-Union Congress of Soviets which meets at least once in two years. It is composed of representatives of town and township Soviets, and of provincial councils of Soviets. During the intervals between the All-Union Congresses supreme authority devolves upon the Central Executive Committee, consisting of the Council of the Union and the Council of Nationalities. The Council of the Union, 450 members, is elected by the All-Union Congress from representatives of the seven constituent Republics in proportion to their population. The Council of Nationalities, 139 members, is formed of representatives of the Constituent and Autonomous Republics, 5 delegates from each, and of one delegate from each of the Autonomous Areas. The Central Executive Committee selects a Presidium of 27 members, to which the powers of the Committee are delegated while the Committee is not in session. The Presidium

consists of 9 members representing the Presidium of the Council of the Union, 9 representing the Presidium of the Council of Nationalities, and 9 elected by the two Councils in joint session.

Commerce and Industry. Under normal conditions the U.S.S.R. is the world's greatest grower of **rye** and **barley**, and was second only to the United States in the production of **oats** and **wheat**. Less than a quarter of these grain crops were exported. **Skins, hides and furs** are also largely exported under normal conditions. **Flax** and **hemp** are products of the wet soils of the west; **sugar-beets** are cultivated in the southwest, near the Dnieper; and **tobacco**, **vines**, **mulberry trees** and **cotton** are produced in the warm south. The forests yield **timber**, **wood pulp**, **wood-pitch** and **turpentine**, and the tundra yields **furs**. **Coal** is mined west of the Urals, south of Moscow, and in the valley of the Donetz; **iron** is mined in the first two coal fields, in the neighborhood of Krivoi Rog, 100 miles northeast of Kherson and near Kertch in the Crimea. The oil fields of the Caucasus have been for years, and still are, among the richest in the world. Metric system of weights and measures.

Communications. There are about 48,023 miles of railways. There are over 54,500 miles of rivers, canals, and lakes navigable for steamers.

Principal Cities. Moskva (Moscow), the capital; Leningrad, the former capital; Odessa, a great port on the Black Sea; Kiev, the ancient capital; Kharkof, important industrial center.

U. S. S. R. in Asia and Dependencies. *Siberia* forms an integral part of Soviet Russia; *Turkoman*, *Uzbek* and *Tajik* are Soviet Republics; *Kazak*, *Kirghiz*, *Yakutsk* and *Buryat-Mongol* are Autonomous Republics; *Kara-Kalpak* and *Oirat* are Autonomous Areas. Area, 5,791,500 square miles. All products are of potential, not actual importance: gold, coal, iron, timber, wheat, cattle and dairy products.

UNITED STATES OF AMERICA

The Country. Area of the contiguous territory of continental United States is 2,973,774 square miles. Length from north to south is 1,780 miles, width from east to west, 3,100 miles, coastline 21,354 miles. Mountains and highlands cover the eastern and western borders; the Rocky Mountains in the west, the Appalachians in the east. Short slopes and coastal plains, drained eastward by the Hudson, Delaware, Susquehanna, Potomac and other rivers, and westward by the Columbia and Colorado extend from the mountains to the seaboard. Between the mountain systems is the great central valley of the Ohio-Missouri-Mississippi river system. Waterfalls, chief of which is Niagara, are features along many of the rivers. The climates vary in different regions, owing to the size of the country. Its northern regions are in a zone where winters are long and severe; its southern extremities lie near the tropics. But for the most part the country is temperate, though the summers are much hotter and the winters colder than in western Europe. The prevailing winds of the northwest are from the Pacific Ocean; they give the western coast a mild and fairly uniform climate. In Florida and Texas there are regions where tropical vegetation flourishes; in California and the states along the Gulf of Mexico and the Atlantic, as far north as Virginia, subtropical plants are found.

Government. The country, a federal republic of forty-eight sovereign states, is bound together by the pact of 1787, put in force in 1789. The Federal Government, from its seat at Washington, deals with only such matters as the states have delegated to it, and each state retains complete authority over all unenumerated categories. The government looks after foreign relations, army and navy, and dependencies and controls interstate trade,

customs, post office, currency, bankruptcy and patents. The ordinary civil and criminal law are state matters; but income tax, suits between residents of different states, prohibition, and the majority of banks are under the control of Washington. The president and vice-president are elected every four years. The vice-president presides over the senate, and in case the president dies, fills out his term. The president is commander-in-chief of the army and navy, and, until it comes to treaty-making, is supreme in foreign affairs. He can, within ten days of its passage, veto any bill. The senate, representing the states as sovereign entities, has two members from each state, regardless of its importance; the house has state delegations proportionate to their population. Senators sit for six years, and, as one-third retire every second year, the life of the senate is never interrupted and is periodically renewed. Congressmen are elected for two years, a general election being held every presidential year and again two years later.

Commerce and Industry. The mineral supply is one of the chief natural sources of wealth of the country, which exceeds every other in its output of **coal**, **iron**, **oil** and **silver**. The deposits of gold, quicksilver, lead and copper also are extensive. In the west and northeast are dense forests of pine, spruce, birch and maple; in the southeast the cedar, pine, and many valuable hard woods abound; in the east-central part grow oak, maple, hickory, elm, and other useful trees, while in California are found the giant sequoia trees. The great agricultural region, raising three-fourths of the **corn** and **wheat** crop of the world, is in the northern and central part of the Mississippi Valley. Three-fourths of the **cotton** supply of the world, and half the tobacco crop, together with corn, rice, and tropical fruits, grow luxuriantly in the south; grains, vegetables, fruits, including grapes, are cultivated extensively in California. The raising of cattle, sheep, hogs and poultry, are important industries, yielding an immense product for export.

Communications. Total railway mileage, 262,713. Total tonnage of American shipping about 16,500,000. The New York Barge Canal from Buffalo on Lake Erie to Troy on the Hudson River is 352 miles long, to which its Oswego and Cayuga-Seneca tributaries add another 100 miles. The Great Lakes are connected with each other and, by canals, with the Atlantic Ocean, Saint Lawrence River and the Mississippi River. There are over 290 streams in the country used to a substantial degree for navigation, with an approximate navigable mileage of 23,400. Airplanes operate daily over 41,500 miles of airways; the daily mileage flown being twice that figure.

Principal Cities. New York, Chicago, Philadelphia, Detroit, Cleveland, St. Louis, Boston, Baltimore, Pittsburgh, Los Angeles, Buffalo, San Francisco, Milwaukee; Washington, the capital.

Dependencies. The total area of dependencies and non-contiguous territory of the United States is 711,609 square miles, divided as follows: on the Continent of America, *Alaska*, with an area of 586,400 square miles, forms a territory of the United States, governed conjointly by Congress at Washington and by the local legislative assembly consisting of 8 senators and 16 representatives. The seat of government and largest town is Juneau. Other dependencies in America are the *Panama Canal Zone*, with a land area of 379 square miles; the *Virgin Islands* (formerly Danish West Indies), with an area of 132 square miles and its capital, St. Thomas; and the island of *Porto Rico*, with an area of 3,435 square miles and its capital, San Juan.

In the Pacific Ocean is the most important dependency, the *Philippine Islands*, with a total area of 114,400 square miles and the capital, Manila. A governor-general, appointed by the president of the United States, administers the islands in conjunction with the local legislative body,

Tunis: A public square (Place Bab el Bhar) and Mosque in this French protectorate of Northern Africa.

consisting of two houses, the senate and a house of representatives. Other dependencies in Oceania are the island of *Guam*, with an area of 206 square miles; *Hawaii*, with an area of 6,407 square miles with the capital Honolulu; and American *Samoa*, with an area of 76 square miles.

URUGUAY

The Country. Uruguay, a South American republic, has an area of 72,153 square miles. The most notable feature of Uruguay is its long rolling plains, comprising almost the entire length of the country, occasionally broken by low mountain ranges and copiously watered by numerous streams. The Uruguay River forms the western boundary with its chief tributary the Negro, draining the entire central portion of the republic. The climate is generally moderate and healthy.

Government. The executive is divided between the president and a national administrative council. The president is elected for four years by direct vote and may be re-elected after an interval of eight years. The national administrative council consists of nine members, six of the majority party and three of the largest minority party; three retiring every two years. The election is by direct popular vote. The president appoints the ministers of foreign affairs, of war and marine and of the interior and has supreme control of these departments; the other ministers are appointed by the council. The legislative power is vested in a parliament of two houses, the senate and the chamber of representatives, which meet in annual session. In the interval of the session, a permanent committee of two senators and five members of the lower house assumes the control of the executive power. The representatives are chosen for three years. The senators are chosen for six years by an electoral college, whose members are directly elected by the people.

Commerce and Industry. Sheep and cattle raising are the principal industry. Agriculture is also practiced to a considerable extent, nearly all of the cereals being grown. Wine is produced in considerable quantities, and tobacco and olives are cultivated. In the northern department, gold mines are worked. Silver, copper, lead, magnesite and lignite coal are found. The exports consist almost entirely of animal products. Metric weights and measures.

Communications. River transport is very extensive. The Uruguay affords the principal means of communication, while railways of a total length of about 1,700 miles link up the ports with the chief centers of commerce.

Principal Towns. Montevideo, the capital and chief seaport; Paysandu, seaport on the Uruguay, with large trade in hides.

VATICAN CITY

On February 11, 1929, a treaty was signed at Roma (Rome), under the terms of which the Pope again becomes an independent sovereign, just as he was through the Middle Ages. His new temporal realm is the smallest independent state in the world and probably the smallest in all history, with an area of 109 acres.

VENEZUELA

The Country. Venezuela has an area of 393,976 square miles. It comprises roughly the basin of the Orinoco and the district surrounding the Gulf of Maracaibo. The country is divided geographically into three distinct zones, viz., the extensive plains and river valleys, known as llanos, affording excellent pasturage for cattle; the mountain section, formed by three mountain ranges; and the tablelands. This variety of physical features yields an equal

variety of climate, products and soil.

Government. Legislative authority of the republic is vested in a congress of two chambers, the senate and the chamber of deputies. The former consists of forty members elected for three years, two for each state. The latter is constituted by direct election for three years. The executive power is exercised by the president in conjunction with the cabinet ministers through whom he acts. The president is elected by congress for seven years; there is no restriction as to re-election.

Commerce and Industry. Coffee and cacao are largely grown and exported, and wheat and other cereals thrive. The mountains are heavily wooded and many useful trees and plants are found. Petroleum is now a leading product. The mines produce gold, silver, copper and lead; the various asphalt lakes yield the best quality of asphalt; along the coast, pearls are obtained. Metric weights and measures.

Communications. Total railway mileage is about 700 miles. The waterways of Venezuela form important means of communication and transportation, there being no less than 70 navigable rivers in the country with a total navigable length of 11,000 miles, of which the Orinoco with its tributaries furnishes nearly 4,000 miles. A regular steamship service is maintained on the Orinoco, between Ciudad Bolivar and the interior, as well as points along the coast. Ocean-going vessels enter Lake Maracaibo, which is navigable in its entirety.

Principal Towns. Caracas, the capital; Maracaibo, the city with extensive export trade in coffee, cacao and rubber, Valencia, Barquisimeto, Ciudad Bolivar, on the right bank of the Orinoco, with export trade of coffee, hides, etc.; Puerto Cabello and La Guaira, seaports.

YUGOSLAVIA

The Country. Yugoslavia or the Kingdom of the Serbs, Croats and Slovenes, occupies the northwest corner of the Balkan peninsula. It combines the old kingdoms of Serbia and Montenegro, the former Austro-Hungarian territories of Bosnia and Herzegovina, the former Hungarian provinces of Croatia-Slavonia and parts of the Banat and Baeska, and portions of Styria, Carniola and Dalmatia, former Austrian provinces. It consists essentially of a mountainous core, most of which is over 3,000 feet in elevation, which stretches from the Dinaric Alps in the northwest to the Balkan Mountains on the Bulgarian frontier. The only valley which cuts the mountains and forms a passage-way is that of the Morava, which, with that of the Vardar, leads from Belgrade to Saloniki. Beyond the Save-Danube, as far as the northern boundary, the land is low, swampy near the rivers, with a few minor elevations. The chief concentrations of people are round Zagreb (Agram) and near Belgrade. The area is 96,134 square miles.

Government. Yugoslavia is a limited monarchy, with a one-chamber parliament, the Narodna Skupstina (National Assembly). The Assembly has 315 deputies. It is summoned by the sovereign who also has the right to dissolve it. Parliament is elected for four years on the basis of one deputy for every 40,000 inhabitants.

Commerce and Industry. Agriculture is the chief industry. Mediterranean fruits, chiefly plums, and tobacco are successfully grown. Swine are reared in the oak and beech forests; cattle, sheep and goats are also reared. Some wheat is grown. Small quantities of iron ore are mined. Coal occurs near Sarajevo and Banjaluka. Lead, iron and coal are mined in Serbia. Quicksilver is extensively mined. The principal imports are textiles, agricultural products, animal products, chemicals, leather
